KPIs for Supplier Screening

Question

Does the company monitor and report on coverage and progress of its supplier screening program?

Rationale

The purpose of this question is for companies to disclose the results of the supplier screening process. It is important to monitor the coverage and results of a supplier screening program to ensure suppliers are being screened and categorized appropriately and that risks are being managed. This question seeks to understand if companies are capturing the number of different suppliers they have, whether they are categorized into significant suppliers, and whether new suppliers are screened for ESG risks. This question forms the basis for the question "KPIs on Supplier Assessment and Development"

Performance Summary	
Question Level Company Performance	60
Question Weight	15
Year-on-Year Change	0
Industry Average Score	12
Industry Highest Score	90

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Supplier screening: A systematic desk research of suppliers' risk for negative ESG impacts and their business relevance, considering available data sources such as country, sector, or commodity ESG risks, spending, business relevance, etc. Methodology development and screening process can be realized by the company itself, or with the support of or through external specialists.

Suppliers are only counted once within the fiscal year. When providing data, please note that these are unique significant suppliers screened during the reporting period (not the number of screenings realized, i.e. no multiple counts of suppliers if they were screened more than once during the reporting period).

Significant suppliers: Significant suppliers are suppliers that are identified as having substantial risks of negative ESG impacts or significant business relevance to the company or a combination of both. The portfolio of significant suppliers should be the key audience of a company's supplier ESG assessment and development program. Critical suppliers identified are also accepted as significant suppliers, even though in most cases only business relevance, and not ESG risk, is considered when identifying critical suppliers

Tier 1 suppliers: This refers to suppliers that directly supply goods, materials or services (including intellectual property (IP) / patents) to the company. If the company does not specify, we will assume it is Tier 1.

Non-tier 1 suppliers: This refers to suppliers that provide their products and services through Tier 1 suppliers to the company. Non-tier 1 suppliers are located beyond Tier 1 suppliers, e.g. on Tier 2, 3, or n-level of a company's supply chain.

Data Requirements

Public Reporting

- In order to accept public reporting for the screening process, disclosure is needed for "1.2 Total number of significant suppliers in Tier-1", "1.3 Percentage of total spend on significant suppliers in Tier-1" and "1.4 Total number of significant suppliers in non Tier-1" for the last fiscal year.

Third Party Verification

- To accept third party verification, data must be verified for the most recent financial year by an appropriate verification or auditing firm. Government verification is not considered relevant

No significant suppliers identified

If a company's Total number of significant suppliers in Tier 1 (1.2) and Total number of significant suppliers in non Tier-1 (1.4) are equal to zero, this is only acceptable if

- The company publicly reports on an acceptable systematic supplier screening approach to identify significant suppliers in the Supplier Screening question and;
- The company publicly reports that it identified zero significant suppliers as having substantial risks of negative ESG impacts or significant business relevance to the company or a combination of both.

Please note that answering 0 in this question will affect the successive questions in this criterion.

Not Applicable – General Rule

"Not Applicable" for this question (beyond the industries detailed below) will only be accepted for special cases. In such cases, the company must credibly explain via a comprehensive company comment and/or public reporting that it does not purchase goods or services for the purposes below. To be granted "Not Applicable", the company must state they:

- Do not use goods or services in the company's production processes, and
- Do not re-sell goods or services to the company's customers, and
- Do not utilize goods or services as capital goods (e.g. machines/infrastructure) in company's operations.

Industry-specific special cases:

REI – Equity Real Estate Investment Trust (REITs): companies that have only marked 'Management of Standing Investments' as the main activity of the business in question '0.1 Denominator Area' should mark "Not Applicable" in this question.

REM – Real Estate Management & Development: companies that have only marked 'Services' as the main activity of the business in question '0.1 Denominator Area', should mark "Not Applicable" in this question.

OIE - Energy Equipment & Services Industry: Services Companies (consultancy or seismic surveying), should mark "Not Applicable" in this question.
