Sustainability Taxonomies

Question

Does your company report its revenues, capital expenditure and operating expenditure in line with a sustainability taxonomy or framework?

Rationale

The purpose of this question is to identify companies that have business activities that can be considered eligible for or aligned to a designated sustainable finance taxonomy. In recent years, there has been a development of sustainable finance taxonomies which aim to categorize business activities as "green". The leading framework, the EU Taxonomy, is now legally in force within the European Union; in the years to 2025, an increasing number of European companies will be within the scope of this legislation. There are a range of other jurisdictions that are either developing or implemented a taxonomy for the classification of green activities. These may be legally or voluntarily applied.

The S&P Global Inc. Corporate Sustainability Assessment (CSA) aims to be standard agnostic and therefore the question allows participants to designate the taxonomy they have mapped their operations. It recognizes that companies may do this as they are legally obligated, or they have voluntarily mapped their operations to obtain a competitive advantage or attract investment.

Performance Summary	
Question Level Company Performance	0
Question Weight	20
Year-on-Year Change	0
Industry Average Score	11
Industry Highest Score	40

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Sustainability Taxonomy: A framework that provides clear definitions of business activities that can be considered environmentally or socially beneficial. The framework may be legally enforced by relevant financial regulators within the jurisdiction in which the company operates, or a voluntary framework the company has decided to disclose towards.

Taxonomy-Eligible: A business activity that a sustainability taxonomy considers relevant to its framework.

Taxonomy-Aligned: A business activity that is taxonomy-eligible and passes relevant tests provided by the framework. An example within the EU Taxonomy is an eligible activity passing Substantial Contributions, Do No Significant Harm (DNSH), and Minimum Social Safeguards (MSS) to become an aligned activity.

Aggregate Mapping: A total of all the taxonomy-eligible and taxonomy-aligned activities combined.

Activity-Level Mapping: A breakdown of individual activities and their eligibility as well as alignment to the relevant sustainability taxonomy.

Data Requirements

Geography of Framework: Please indicate the geography, economy, or trading bloc of which your company falls within the scope of its sustainable finance taxonomy. If the company disclosed towards a taxonomy not within the list, please choose "Other taxonomy" and add it to the text field. If the company voluntarily aligns to a taxonomy that it is not legal within the scope of, please choose "Our company is not within the legal scope".

Please note, the list is forward-looking and although your jurisdiction may be present, it does not mean your company is required to report against it unless legally obligated or voluntarily chosen to. If you are not legally required and have not reported against it, please choose Not Applicable.

Aggregate mapping: For company revenue, capital expenditure, and operating expenses, please provide the following information within the green boxes:

Total figures: Totals within the designated currency unit

Total of which is taxonomy-eligible: Total percentage of activities that are eligible to the relevant taxonomy. This can also be described as "proportion" of turnover, capital expenditure or operational expenditure that is dedicated to that activity.

Total of which is taxonomy-aligned: Percentage of total figures that are aligned to the relevant taxonomy. Please note, this is percentage of total revenue, capital expenditure or operating expenses, not the percentage of the eligible figures. Please note that the aligned percentage-value cannot be higher than the eligible percentage-value for each item (revenue, capital expenditure or operating expenses).

There is a series of calculated data points that will return figures depending on what the participant company submits.

Activity-level breakdown: If the company has performed an activity-level breakdown of eligibility and alignment to the relevant taxonomy, please indicate where this is in company reporting.

Supporting Evidence: The question is public and requires evidence to be identified within the company reporting or website.

Questionnaire

Does your company report its revenues, capital expenditure and operating expenditure in line with a sustainable activity reporting framework? Please indicate where this information is available in your public reporting or corporate website.

1. ○
   Yes, we have mapped our activities against a sustainability taxonomy or framework, and it is available publicly in company reporting:

   Geography of Framework

   1. ☐
      Our company is within the scope of a sustainability taxonomy framework within the following geography:
      1. ○ European Union
      2. ○ China
      3. ○ ASEAN
      4. ○ South Africa
      5. ○ Colombia
      6. ○ Other taxonomy, please specify
      7. ○ Our company is not within the scope of a sustainability taxonomy but we have voluntarily mapped alignment, please specify below:

   Aggregate Mapping

   1. ○
      Yes, we have conducted an overall aggregate mapping of our eligibility and alignment to the above taxonomy, please submit details below:

Aggregate of Eligibility & Alignment	Revenue	Capital Expenditure	Operational Expenditure
Total figures for your company	100.0%	100.0%	100.0%

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

Please provide totals in monetary units

Total of which is Taxonomy-Eligible

Please provide percentage of the total figure for your company that is taxonomy eligible.

Total of which is Taxonomy-Aligned

Please provide the percentage of the total figure for your company that is taxonomy aligned.

Total of which is not Taxonomy Eligible

Please review the calculated totals that are not taxonomy eligible

2. ○

No, we have not conducted an overall aggregate mapping of our eligibility and alignment to the above taxonomy.

Activity-Level Breakdown of Mapping

1. ○

Yes, we have publicly mapped our eligibility and alignment at activity-level and it is available here:

2. ○

No, we have not publicly mapped our eligibility and alignment at an activity-level

2. ○

No, our company is within the scope of taxonomy regulation within our jurisdiction but we have not publicly reported against it.

3. ○

Not applicable. Please provide explanations in the comment box below.
