OHS Policy

Question

Does the company have a policy on Occupational Health & Safety (OHS) and is it available publicly?

Rationale

The purpose of this question is to identify companies that have an active commitment to occupational health and safety in line with the most relevant international OHS standards. The policy needs to be company-specific with a company-wide commitment and not just for a single site, business unit, or project.

The OHS policy should cover a set of commitments that capture the long-term direction of the organization in terms of health and safety. It sets the company's approach to health and safety and establishes in a clear way what the company's expectations towards employees and other interested parties are.

The OHS policy provides an overall commitment, as well as a necessary framework for the organization to set its objectives and take action to achieve the intended outcomes of the OHS management system.

The commitments included in the policy are then reflected in the processes companies establish to ensure a robust, credible, and reliable OHS management system. Therefore, an OHS commitment is a precious and necessary step on what to build further measures.

The OHS policy should set the direction for effective health and safety management. Board members need to establish a health and safety policy that is much more than a document – it should be an integral part of the organization's culture, of its values, and performance standards.

Performance Summary	
Question Level Company Performance	66
Question Weight	12
Year-on-Year Change	54
Industry Average Score	26
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.
