**Employee Turnover Rate**

## Question

Does the company track its employee turnover rate?

## Rationale

People are one of the main drivers of corporate growth and play an essential role in the successful execution of companies' strategies. In this question, we assess both total and voluntary turnover. Total turnover may fluctuate and reflect industry trends or economic cycles. Voluntary turnover is a better indicator to evaluate a company's ability to retain its employees. This indicator may reflect high levels of uncertainty or dissatisfaction among employees or structural organizational changes. High turnover may impact employee productivity and lead to increased costs due to higher expenses for employee recruitment. Finally, it is very important to evaluate turnover patterns by age, gender, or other employee groups as this can be an indication of incompatibility or potential inequity in the workplace.

### Additional Question Guidance & Information Display

**Key Definitions**

**Total employee turnover:** Refers to the proportion of employees who leave an organization over a set period (often a year), expressed as a percentage of the total employees. The figure should be calculated using the total number of employees at the end of the latest reporting year. The total employee turnover rate number should be the sum of the voluntary employee turnover and the involuntary employee turnover rate.

**Voluntary employee turnover:** Refers to the proportion of employees who choose to leave an organization (such as resignation, retirement, early retirement etc.) over a set period (often a year), expressed as a percentage of the total employees. The figure should be calculated using the total number of employees at the end of the latest reporting year.

**Data Requirements**

- If the company doesn't have a lot of FTEs because they outsource all their activities to contractors, then contractors are to be considered employees and the question will be applicable.
- If the company's definition of the turnover rates does not match our definition, then mark '**Not Applicable**' for this question

**Disclosure requirements**: Additional credit will be granted for relevant publicly available evidence covering the following aspects of this question, for at least the most recent reported year.

- Total employee turnover rate
- Voluntary employee turnover rate

**Data Breakdown:**

- We don't expect companies to break down the data by all the categories mentioned in the question, but full points will be granted for this section for having a breakdown for at least 2 categories. The purpose of this section is to assess whether companies are able to track these metrics in a way to be able to evaluate and ensure fair treatment of all employees.
- In Europe, according to **Article 9 of the GDPR**, it is prohibited to process personal data revealing racial or ethnic origin, except if the data subject has given explicit consent to the processing of those personal data, provided this is not prohibited by national law. Other exemptions exist, such as reasons of substantial public interest which might include statistical research purposes for equality of opportunity and treatment. We therefore expect companies to report on **only two different categories**, in order to not penalize companies that do not report data breakdown on race.
- For this section, companies can attach either private or public evidence and we expect to see the specific quantitative data broken down by these categories.

**Please note:** If you have less than 100 employees or no employees in your organization, then **please mark the question as 'Not Applicable'.**
