Sustainability Reporting Assurance

Question

Does the company have external assurance for its sustainability reporting?

Rationale

As with financial data, assurance of environmental and social data ensures that it is more reliable and increases the likelihood that investors will use these data in their analysis and investment decisions. Transparency about the assurance process and the data assured also increases stakeholders' trust in published information.

The purpose of this question is to assess the extent to which companies are disclosing the details related to their environmental and social assurance.

Performance Summary	
Question Level Company Performance	0
Question Weight	40
Year-on-Year Change	(100)
Industry Average Score	30
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Assurance specialists: Include accountants, certification bodies, and specialist consultancies. It does not include an independent advisory board, stakeholder panel, or high-level individual (e.g., Environmental Minister).

The declaration of independence: An explicit statement of independence from the auditor confirming that there is no other commercial link to the company's operations or business that could result in a conflict of interest.

Recognized international or national standard: refers to assurance standards and not reporting standards (such as GRI guidelines). Examples of these assurance standards are AA1000AS and ISAE 3000, but regional or local standards are also acceptable if they are clearly specified and are comparable to international standards.

Examples include:

- Standard DR03422 (Australia/New Zealand)
- Assurance Engagements of Sustainability Reports (Germany)
- Environmental Report Assurance Services Guidelines by the JICPA (Japan)
- FAR auditing standard RevR6 (Sweden)
- Standard 3810 Assurance Engagements related to Sustainability Reports (the Netherlands)
- AT-C Section 105 and 210 (United States/Canada)

Scope of assurance: If the scope of assurance covers some (but not all) environmental indicators, these need to be clearly marked in the relevant sections of the report. If the assurance statement covers all data items in the report, this also needs to be explicitly stated.

Conclusion/Level of assurance: This refers to the conclusion of the assurance process which is according to the level of assurance, i.e., *limited/moderate or reasonable assurance*. The level of assurance indicates the extent and depth of the work the assurance provider undertakes in relation to sustainability disclosures. Most assurance providers offer two levels: "reasonable" assurance (i.e., high but still involving some risk of inappropriate conclusion) or "limited" assurance (i.e., moderate) (GRI, 2013).

Supporting evidence:

This question requires supporting evidence from the public domain. The information provided has to be included in your public reporting (e.g., annual report, sustainability report, integrated report, company publications, separate fuel efficiency strategy document) or corporate website.

Any response that cannot be verified in the attached public document(s) will not be accepted.

UNGC Questionnaire - G13

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's external assurance about sustainability reporting	Not measured
Environmental Assurance: External assurance contains declaration of independence of assurance provider specifying no conflict of interest	Not measured
Sustainability Reporting Assurance: External assurance is based on international standard (e.g. AA1000AS, ISAE 3000)	Not measured
Social scope: The assurance statement includes scope of assurance and clearly indicates partial coverage of KPIs, if any (2024)	Not measured
Environment Scope: The assurance statement includes scope of assurance and clearly indicates partial coverage of KPIs, if any (2024)	Not measured
Environmental Assurance: The assurance statement contains a conclusion, i.e. either "reasonable assurance" or "limited assurance"	Not measured

Questionnaire

Does the company employ external assurance providers to conduct assurance for its sustainability reporting and is this information available publicly?

1. ○

   Yes, the company's sustainability reporting is externally assured. Please indicate where this information is available in **public reporting or corporate website**.

   1. ☐ The assurance statement is based on a recognized international or national standard (e.g. AAIOOOAS, ISAE 3000).
   2. ☐ The assurance statement contains a "declaration of independence" which specifies that the assurance provider has no conflict of interest in relation to providing the assurance of environmental and / social data for the company which has been assured
   3. ☐ The scope of the assurance statement clearly indicates that it covers **environmental KPIs**. *If only some KPIs are assured, then it is clearly indicated which data/KPIs disclosed in the report have been assured.*
   4. ☐ The scope of the assurance statement clearly indicates that it covers **social KPIs**. *If only some KPIs are assured, then it is clearly indicated which data/KPIs disclosed in the report have been assured.*
   5. ☐ The assurance statement contains a conclusion, i.e. either "reasonable assurance" or "limited assurance"

2. ◉

   No, the company does not publicly report information on whether its sustainability reporting is externally assured.

3. ○

   Not applicable. Please provide explanations in the comment box below.
