Human Capital Return on Investment

Question

Does the company publicly report the following information on a standard human capital return on investment metric, serving as a global measure of the return of the company's human capital programs?

Rationale

The Human Capital Return on Investment provides a means of measuring a company's profitability in relation to total employee costs. It is derived by removing non-employee costs from overall operating costs and deriving the resulting operating profitability. This metric provides a view into the degree to which economic value is derived by looking at profitability solely in relation to human capital costs.

Performance Summary	
Question Level Company Performance	86
Question Weight	15
Year-on-Year Change	86
Industry Average Score	60
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Total Revenue: it refers to the amount your company has received in revenues before any deductions are made.

Total operating expenses: it refers to all the expenses your company has from its operations. It should be in line with accepted financial accounting and reporting standards including everything a company will have defined in its income statement.

Total employee-related expenses (salaries + benefits): this includes training and development programs, pensions, hiring, etc., as it covers all costs directly related to employees.

Data Requirements

- By subtracting Total Operating Expenses (b) less Total employee-related expenses (salaries + benefits) (c) from Total Revenue (a), your company's profitability prior to human capital costs is calculated. Dividing this figure by Total employee-related expenses (salaries + benefits) (c) then leads to the ratio that examines your company's level of profitability in relation to the total human capital expenses.

Supporting evidence:

- This question requires supporting evidence from the public domain. The information provided has to be included in your public reporting (e.g., annual report, sustainability report, integrated report, company publications, separate fuel efficiency strategy document) or corporate website.
- Any response that cannot be verified in the attached public document(s) will not be accepted.

Please note:

- If you have **25 or less FTEs** in your organization, then please mark the **entire criterion** as **"Not applicable"**.
- If you have **26-100 FTEs**, then also this questions will be marked as **"Not applicable"**.

Standards & Frameworks

GRI Disclosure - 201-1

IRIS+ - FP1001, FP4831

WEF Metrics - Economic contribution, Monetized Impacts of Training - Increased earning capacity as a result of training intervention (%, $)
