Gender Pay Indicators

Question

Does the company track the results of its gender pay gap or equal pay analysis?

Rationale

This question assesses a company's pay practices by evaluating the results of its gender pay assessments. An increasing number of countries are adopting regulations which require companies to conduct such pay assessments and to disclose the results, making this topic of high strategic importance. Furthermore, unequal remuneration and gender pay gaps pose a threat to a company's ability to attract and retain women talent, lowers employee engagement, and can lead to reputationally damaging controversies.

Performance Summary	
Question Level Company Performance	60
Question Weight	20
Year-on-Year Change	12
Industry Average Score	29
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Executive level: Employees who have an executive function and play a strategic role within an organization. They hold senior positions and impact company-wide decisions. Executives usually report directly to the CEO, and the CEO is included in the definition of executive level.

Management level: All management-level positions from first-line/junior managers up to top/senior managers with a reporting line 2 levels or less from the CEO, but excluding executive-level positions. Managerial functions are those that involve planning, policy-making, strategizing, leading, and controlling.

Non-management level: Employees in charge of executionary functions, such as production and administrative positions. These employees have limited or no managerial role.

Other cash incentives: These are monetary incentives paid on top of the employee's regular salary to reward employees for job performance or longevity. These incentives have an explicit monetary value and can include rewards such as bonuses and stock options.

Equal pay: Equal pay compares the salary of men and women who have the same or equivalent positions to assess whether they are paid the same for equal work.

Gender pay gap: The gender pay gap is the difference in average gross hourly earnings between women and men – it therefore assesses the difference in pay at the aggregated level. Calculated this way, the gender pay gap does not take into account all the different factors that may play a role, for example, education, hours worked, type of job, career breaks, or part-time work. However, it reflects the work that women do and their position in the company hierarchy, therefore also providing an indicator of equality of opportunities to develop one's career and access higher-paid positions.

Mean gender pay gap: The difference between the mean hourly rate of pay of male full-pay relevant employees and that of female full-pay relevant employees.

Median gender pay gap: The difference between the median hourly rate of pay of male full-pay relevant employees and that of female full-pay relevant employees.

Mean bonus gap: The difference between the mean bonus paid to male relevant employees and that paid to female relevant employees.

Median bonus gap: The difference between the median bonus paid to male relevant employees and that paid to female relevant employees.

Coverage: Please select the coverage range on which you are reporting. For example, if you are reporting on your employees in country ABC, and these employees make up 80% of your total workforce, please select the coverage range ">75%".

Data Requirements

Disclosure requirements for partially public question: Additional credit will be granted for relevant publicly available evidence disclosing the metrics requested either for equal remuneration or for the gender pay gap.

If your company conducts both equal pay and gender pay gap assessments, please select the option for which you have data for the highest proportion of your employees.

Please note: If you have less than 100 employees or no employees in your organization, then **please mark the question as "Not applicable"**.

International standards: ILO convention No. 111

The gender equality questions were developed in collaboration with **EDGE,** leveraging its robust research on gender equality. EDGE is the leading global assessment methodology and business certification standard for gender equality. It measures where organizations stand in terms of gender balance across their pipeline, pay equity, effectiveness of policies and practices to ensure equitable career flows as well as inclusiveness of their culture. Launched at the World Economic Forum in 2011, EDGE has been designed to help companies not only create an optimal workplace for women and men but also benefit from it. EDGE stands for Economic Dividends for Gender Equality and is distinguished by its rigor and focus on business impact. EDGE Certification's diverse customer base consists of 200 large organizations in 44 countries across five continents, representing 29 different industries and employing globally more than 2.4 million employees.

The study **"Do Firms Respond to Gender Pay Gap Transparency?"** (January 2019) examined the effect of pay transparency on the gender pay gap and firm outcomes by examining a 2006 policy change in Denmark that required firms to provide gender dis-aggregated wage statistics. Using detailed data and a differences-in-differences statistical approach, Bennedsen et al. found that the law indeed reduced the gender pay gap.
