Year: Methodology Year: 2025
Question: Water Consumption
Include Modeled Scores : Yes

Water Consumption

Question

Does the company track its freshwater consumption, including water withdrawal and discharge?

Rationale

Water is becoming increasingly scarce, and such scarcity poses a considerable risk to many sectors. Considering water withdrawal, consumption and discharge practices can enhance companies' competitiveness by reducing costs and environmental liabilities. It can also mean companies are better prepared for future environmental regulations.

Performance Summary	
Question Level Company Performance	100
Question Weight	25
Year-on-Year Change	1
Industry Average Score	48
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Water withdrawal (excluding saltwater): Water withdrawal is defined as the sum of:

i. Fresh surface water, including rainwater, water from wetlands, rivers and lakes

ii. Groundwater – renewable and non-renewable

iii. Produced/entrained water

iv. Third party sources

Fresh surface water: Fresh surface water, including rainwater, water from wetlands, rivers, lakes and fresh water that requires minimal treatment to be acceptable for domestic or agricultural uses.

Groundwater - renewable and non-renewable: Groundwater that can be recovered from underground.

Produced/entrained water: Produced water, reinjected produced water.

Third party sources: Municipal water, local third-party water purchase, city water from public water department, trucked water purchased, tap water and reclaimed water.

Water discharge (excluding saltwater): The water leaving the organization's boundary and being released to surface water, groundwater or third parties during the reporting year.

Total net fresh water consumption: Water withdrawal (excluding saltwater) – water discharge (excluding saltwater).

Data Requirements

- If the company is reporting on brackish surface water/seawater/saltwater, please deduct it from water withdrawal and water discharge, because we want to capture only total net fresh water consumption.
- **Third-party verification:** For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.
- **Please note:** If the company **has reported a value of zero** in the table, third-party verification or supporting evidence is required (e.g., comprehensive comment, internal documentation or public reporting) to substantiate the zero reported.
- **Please note:** In cases where the company is classified within the **Banks (BNK)**, **Financial Services (FBN)**, **Insurance (INS)**, or **Professional Services (PRO)** industries, the score obtained in this question will not contribute to the final score of the company.
- **MUW:** This question should be marked **"Not Applicable"** for utilities generating more than 50% of their revenues from drinking water supply, distribution or wastewater treatment.

Data Consistency

- If the environmental performance data reported in the questionnaire does not correspond to publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all.
- If there is a temporary reduction in coverage due to, for example, a major acquisition, the corresponding box should be marked and the reduction explained.
- If it is not possible to report the figures in absolute terms, the data should be reported in relative terms, and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.

General Data Requirements

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

Environmental performance data should cover the activities of the entire company, with the same consolidation as used in financial reporting, and it must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section.

Target: We require the absolute target for the most recent reporting year. If your company has a multiple year and/or relative target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing well towards achieving the target by the end of the target period.

In particular, environmental data of group companies should follow these rules:

- Environmental data of companies that are consolidated proportionally must be considered in proportion to how they are consolidated financially.
- Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.
- Environmental data of business travel other than by an owned and/or operated fleet should not be included unless specifically asked for.
- Environmental data should refer to the specific company structure of each particular year. There should be no pro forma backward consolidation of the current company structure.
- Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company was no longer consolidated.
- Environmental data of companies that have been bought should only be included as of the reporting period in which the company was consolidated financially for the first time.
- Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known.
- Where the reported environmental data deviates from these definitions, you are asked to explain in what way the data provided differs from the definitions.
- If a company publicly reports on long-term but not annual targets, an annual target must be estimated based on internal target setting or a linear distribution.
- The data must be provided in the unit indicated in the question. If the company is tracking the specific indicator in a different unit, the unit converter must be used to convert the data into the preferred unit.
- Please ensure that the Company Information section has been filled in correctly and that the coverage in the table below is based on the same denominator.

Disclosure Requirements

Disclosure requirements for a partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Total net fresh water consumption for at least the most recent reported year.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's total net fresh water consumption, including data for fresh water extraction and consumption available	Applicable
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2021) (Million m³)	Not answered
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2022) (Million m³)	Not answered
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2023) (Million m³)	0.318
Discharge: Water returned to the source of extraction at similar/higher quality as raw water extracted (2024) (Million m³)	0.433
Total net fresh water consumption excluding saltwater from water withdrawal and water discharge (2021) (Million m³)	5.933
Total net fresh water consumption excluding saltwater from water withdrawal and water discharge (2022) (Million m³)	6.154
Total net fresh water consumption excluding saltwater from water withdrawal and water discharge (2023) (Million m³)	5.910
Total net fresh water consumption excluding saltwater from water withdrawal and water discharge (2024) (Million m³)	6.378
Water Consumption target for last fiscal year reported (Million m³)	0.216
Water Consumption: Data Coverage (2021)	100
Water Consumption: Data Coverage (2022)	100
Water Consumption: Data Coverage (2023)	100
Water Consumption: Data Coverage (2024)	100
Public reporting: Water consumption data is publicly available	YES
Water consumption data has been verified by a third-party for the most recent fiscal year	YES
Data consistency: Water consumption data reported in the questionnaire differs from publicly available data	-
Data consistency: Temporary coverage reduction or target challenge in water consumption data due to corporate actions	-
Data consistency: Water consumption data is not reported in absolute terms and is normalized	-

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

QUESTION LEVEL INPUT	COMPANY ANSWER
Total amount of water withdrawn (2021) (Million m³)	Not answered
Total amount of water withdrawn (2022) (Million m³)	Not answered
Total amount of water withdrawn (2023) (Million m³)	1.209
Total amount of water withdrawn (2024) (Million m³)	1.231

Questionnaire

Please provide the company's **total freshwater consumption**, including data for water discharge and withdrawal. Please refer to the information button for additional information. For each row in the table, it is mandatory that the values are provided in the same unit. Also, please ensure that the company has correctly filled in the Company Information section at the beginning of the questionnaire and that the coverage in the table below is related to the denominator relevant for the company as indicated in that section.

1. (•)

	Units	FY 2021	FY 2022	FY 2023	FY 2024	Please indicate the company's target for FY 2024
A. Water withdrawal (excluding saltwater)	Million cubic meters	Not answered	Not answered	1.20877612	1.231	
B. Water discharge (excluding saltwater)	Million cubic meters	Not answered	Not answered	0.318243	0.433	
Total net fresh water consumption (A-B)	Million cubic meters	5.932926	6.1535	5.9097531	6.378	0.2164801
Data coverage	percentage of:	100	100	100	100	

PUBLIC REPORTING

1. [x] The company's data is publicly available. Please provide supporting evidence or web link.

THIRD PARTY VERIFICATION

1. [x] The company's data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

DATA CONSISTENCY

1. [ ] The company reports publicly on this information, but the data in the table above differs from its publicly reported figures. Please provide an explanation in the comment box for this difference:
2. [ ] The company has a temporary coverage reduction or target challenge due to corporate actions. Please briefly explain if a merger, acquisition, divestment, etc. has temporarily caused a reduction in the company's ability to report optimal coverage or caused the company target to appear abnormal:
3. [ ] The company is not able to report this information in absolute terms, the information provided in the table above is normalized data. For the purpose of this question, please always provide absolute figures if available.

2. ( ) The company does not track water withdrawal.
3. ( ) Not applicable. Please provide explanations in the comment box below.
4. ( ) Not known
