Government Ownership

Question

Does the company report whether governmental institutions own more than 5% of the total voting rights of the company?

Rationale

Corporate governance systems aim to ensure that a company is managed in the interests of its shareholders. In this question, we assess if a government has voting rights of more than 5% and has golden shares in the company. Academic research (e.g., Goldeng et. al., 2008; Chen et. al., 2017) suggests that companies without government ownership perform better than companies with government ownership.

Performance Summary	
Question Level Company Performance	100
Question Weight	6
Year-on-Year Change	0
Industry Average Score	93
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Government ownership: We adopt the Organization for Economic Co-operation and Development (OECD) definition for government institutions and ownership (2005): "Enterprises where the state has significant control through full, majority, or significant minority ownership. In this definition, we include state-owned enterprises (SOEs) which are owned by the central or federal government, as well as SOEs owned by regional and local governments."

This definition includes government pension funds, state asset management funds, development banks (federal and local), and sovereign wealth funds.

Golden shares for governments: A type of share that gives its shareholder veto power over changes to the company's charter. A golden share holds special voting rights, giving its holder the ability to block another shareholder from taking more than a ratio of ordinary shares.

Data Requirements

Government ownership requirements:

Holding companies that own stakes higher than 5% in other companies and that are in turn are majority owned by a government or governmental institution should be reported in this question. For example, a holding company (company A) is 70% government owned. Company A owns 40% of the voting rights in company B. Company B should report 40% government ownership in this question.

In this question, we expect information on the following:

- Total percentage of government ownership (sum of the percentage of individual governmental institutions owning more than 5% of voting rights) or disclosure of all individual governmental institutions owning more than 5% of voting rights
- Golden shares for governmental institutions (only if the corresponding option is marked).

Disclosure Requirements

Listed and/or publicly owned companies are required to provide links to public reports or corporate websites.

Non-listed companies are required to provide the following evidence, depending on the type of company:

- **Family-owned companies and privately owned companies** are required to provide public reports, corporate websites, or internal documents.
- **Cooperatives** are required to provide public reports, corporate websites, or internal documents.
- **State-owned companies** are required to report on their corporate governance in the public domain as their key stakeholder is the general public.

Please note: Answers in the form of 'Confidential additional comments' for any type of non-listed company will not be accepted.
