**Public**

**Year:** Methodology Year: 2025
**Question:** Sustainability Taxonomies
**Include Modeled Scores :** Yes

**Sustainability Taxonomies**

## Question

Does your company report its revenues, capital expenditure and operating expenditure in line with a sustainability taxonomy or framework?

## Rationale

The purpose of this question is to identify companies with business activities that can be considered eligible for or aligned to a designated sustainable finance taxonomy. In recent years, sustainable finance taxonomies have been developed that aim to categorize business activities as "green." The leading framework, the EU Taxonomy, is now legally in force in the EU; in the years to 2025, an increasing number of European companies will be within the scope of this legislation. There are a range of other jurisdictions that are either developing or have implemented a taxonomy for the classification of green activities. These may be legally or voluntarily applied.

The S&P Global Corporate Sustainability Assessment (CSA) aims to be standard agnostic; therefore, this question allows participants to designate the taxonomy they have mapped for their operations. It recognizes that some companies may do this because they are legally obligated, while others may have voluntarily mapped their operations to obtain a competitive advantage or attract investment.

| Performance Summary | |
|---|---|
| **Question Level Company Performance** | 0 |
| **Question Weight** | 20 |
| **Year-on-Year Change** | 0 |
| **Industry Average Score** | 85 |
| **Industry Highest Score** | 100 |

*The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.*

### Additional Question Guidance & Information Display

#### Key Definitions

**Sustainability taxonomy:** A framework that provides clear definitions of business activities that can be considered environmentally or socially beneficial. This framework may be legally enforced by relevant financial regulators within the jurisdiction in which the company operates, or a voluntary framework that the company has decided to disclose.

**Taxonomy-eligible:** A business that a sustainability taxonomy considers relevant to its framework.

**Taxonomy-aligned:** A business activity that is taxonomy-eligible and passes relevant tests provided by the framework. An example within the EU Taxonomy is an eligible activity passing Substantial Contributions, Do No Significant Harm (DNSH) and Minimum Social Safeguards (MSS) to become an aligned activity.

**Aggregate mapping:** The total of all the taxonomy-eligible and taxonomy-aligned activities combined.

**Activity-level mapping:** A breakdown of individual activities and their eligibility as well as alignment to the relevant sustainability taxonomy.

#### Data Requirements

**Geography of framework:** Please indicate the geography, economy or trading bloc within which your company's sustainable finance taxonomy falls. If the company discloses a taxonomy that is not on the list, please choose "Other taxonomy" and add it to the text field. If the company voluntarily aligns to a taxonomy that is outside the legal scope of a sustainability taxonomy, please choose "The company is not within the legal scope of a sustainability taxonomy but has voluntarily mapped alignment. Please specify below."

**Non-EU companies guidance:** Please note that the list is forward-looking, and although your jurisdiction may be present, that does not mean your company is required to report against it unless this is legally obligated or voluntarily chosen. If you are not legally required and have not reported against it, please choose "Not applicable". Non-EU companies can also map their data to the EU taxonomy, but they should choose "The company is not within the legal scope of a sustainability taxonomy but has voluntarily mapped alignment. Please specify below" and write "European Union." Finally, if you are reporting to "Other taxonomy", write or choose it and submit the percentage of your business meeting those requirements as both eligible and alignment. For instance, if 90% of your revenue meets the local taxonomy, write 90% in both eligible and alignment. Aggregate mapping: For company revenue, capital expenditure and operating expenses, please provide the following information within the green boxes:

**Total figures:** Totals within the designated currency unit.

**Total of which is taxonomy-eligible:** Total percentage of activities that are eligible to the relevant taxonomy. This can also be described as the "proportion" of turnover, capital expenditure or operational expenditure that is dedicated to that activity.

**Total of which is taxonomy-aligned:** Percentage of total figures that are aligned to the relevant taxonomy. Please note that this is the percentage of total revenue, capital expenditure or operating expenses, not the percentage of the eligible figures. Also note that the aligned percentage value cannot be higher than the eligible percentage value for each item (revenue, capital expenditure or operating expenses). There is a series of calculated data points that will return figures depending on what the participant company submits.

**Activity-level breakdown:** If the company has performed an activity-level breakdown of eligibility and alignment to the relevant taxonomy, please indicate where this is in company reporting.

**Supporting evidence:** The question is public and requires evidence to be identified within company reporting or website.

#### Disclosure Requirements

The question is public and requires evidence to be identified within the company reporting or website.

| Total of which is Taxonomy-Aligned : Operational Expenditure | Not applicable |
| Our company is within the scope of a sustainability taxonomy framework within the following geography | Not applicable |
| Legal scope of sustainability taxonomy framework | Not answered |

### Questionnaire

Does the company report its revenues, capital expenditure and operating expenditure in line with a sustainable activity reporting framework?

1. ○

   Yes, the company reports its revenues, capital expenditure and operating expenditure in line with a sustainability activity reporting framework. Please indicate where this information is available in **public reporting or corporate website**.

   **Geography of Framework**

   1. ☐

      The company is within the legal scope of a sustainability taxonomy framework within the following geography:

      Please select

      1. ○

# Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

Other taxonomy, please specify

Not applicable

2.

The company is not within the legal scope of a sustainability taxonomy but it has voluntarily mapped alignment, please specify below:

Not applicable

**Aggregate Mapping**

1.

Yes, the company has conducted an overall aggregate mapping of its eligibility and alignment to the above taxonomy, please submit details below:

| Aggregate of Eligibility & Alignment | Revenue | | Capital Expenditure | | Operational Expenditure | |
|---|---|---|---|---|---|---|
| **Total figures for the company**<br>Please provide totals in monetary units | Not applicable | 100.0% | Not applicable | 100.0% | Not applicable | 100.0% |
| **Total of which is Taxonomy-Eligible**<br>Please provide percentage of the total figure that is taxonomy eligible or meets requirements of the taxonomy chosen above. | | Not applicable | | Not applicable | | Not applicable |
| **Total of which is Taxonomy-Aligned**<br>Please provide the percentage of the total figure that is taxonomy aligned or meets requirements of the taxonomy chosen above. | | Not applicable | | Not applicable | | Not applicable |
| **Total of which is not Taxonomy Eligible**<br>Please review the calculated totals that are not taxonomy eligible | | | | | | |

2.

No, the company has not conducted an overall aggregate mapping of its eligibility and alignment to the above taxonomy.

**Activity-Level Breakdown of Mapping**

1.

Yes, the company has publicly mapped its eligibility and alignment at activity-level and it is available here:

2.

No, the company has not publicly mapped its eligibility and alignment at an activity-level.

2.

No, the company is within the scope of taxonomy regulation within its jurisdiction but has not publicly reported against it.

3.

Not applicable. Please provide explanations in the comment box below.
