Biodiversity Risk Assessment

Question

Does the company assess dependency- and impact-related biodiversity risks covering all its relevant activities?

Rationale

This question will determine to what extent companies are taking stock of biodiversity risks. Biodiversity forms the foundation for all of life. Businesses have long utilized nature's resources without having to pay a full price for the privilege. The externalities of these actions have brought the planet to a turning point - Businesses will either have to continue elevated levels of dependency and impacts on nature or follow a more holistic approach. The world - including humans, businesses and economies—faces a risk of collapse if we continue to exceed nature's boundaries. The only foreseeable option is asking businesses to deeply consider their relationship with nature and work collaboratively with stakeholders to achieve mutually beneficial outcomes.

This question focuses on the ability of companies to recognize the importance of biodiversity and related risks and opportunities. This includes identifying risks to alleviate pressure on ecosystems while working within the parameters of business operations. This risk assessment should be used to inform a company-wide risk management process, ideally through a location-specific approach. This question also asks for a high level of industry collaboration with external stakeholders — where meaningful processes are created; upstream and downstream activities operate sustainably; and existing systems are transformed.

Performance Summary	
Question Level Company Performance	91
Question Weight	20
Year-on-Year Change	30
Industry Average Score	27
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Location-specific approach: Refers to dependencies or impacts that occur at a particular place in a company's value chain.

Methodologies and frameworks: Methodology refers to a system used to assess biodiversity-related risks and gauge the reliability of the assessment. A framework provides a structure intended to guide the development of an assessment. Frameworks are intended to assure stakeholders that the biodiversity assessment is guided by a reliable foundation. Acceptable methodologies may include:

- Taskforce on Nature-related Financial Disclosures (TNFD) Locate, Evaluate, Assess and Prepare (LEAP) nature risk assessment approach
- Integrated Biodiversity Assessment Tool (IBAT)
- Species Threat Abatement and Restoration (STAR) metric
- Natural Capital Finance Alliance's Encore
- World Wide Fund for Nature (WWF) Biodiversity Risk Filter

Impact: Represents the positive or negative effects a company has on the state of nature. Examples include the pollution of air, water or soil; the fragmentation or disruption of systems and natural habitats; and the alteration of ecosystems.

Dependency: Aspects of nature's contributions to people that a person or organization relies on to function. Examples include water flow and quality regulation; regulation of hazards such as floods and fires; pollination; and carbon sequestration.

Own operations: Includes any business activity that directly impacts natural capital through its operations such as employees, business, subsidiaries, products and services, business units, regions, sites, plants and facilities. This also includes indirect impacts that depend on critical commodities in its supply chain. Such operations include production, extraction, plantation, construction, power generation, transmission or development activities.

Adjacent areas: Value chain sites that are adjacent (between 0 km and 2 km from the nearest site) to landscapes, seascapes and watersheds critical to biodiversity.

Upstream activities: Activities that include operations related to the initial stages of producing a good or service. Examples include material sourcing, material processing and supplier activities. This includes stakeholders such as brokers, consultants, contractors, distributors, franchisees or licensees, home workers, independent contractors, manufacturers, primary producers, subcontractors, tier 1 and 2 suppliers, and wholesalers.

Downstream activities: Activities that include operations related to processing materials into a finished product and delivering it to the end user, such as transportation, distribution and consumption.

Data Requirements

This question may be marked "The question is not applicable to the company" for companies that can credibly demonstrate in a comprehensive comment that their company has:

- No impact on biodiversity in its own operations
- No impact on biodiversity in its key raw material supply chains
- No impact at the use-phase or end-of-life of its products/services
- No financing activities that impact or depend on biodiversity

Industry-Specific Guidance:

Utilities (ELC, GAS, MUW)

- ELC & GAS: Utilities that have no power generation or transmission businesses or are only in electricity/gas distribution should mark "The question is not applicable to the company" and provide an explanation in the comment box.
- MUW: Pure water utilities should mark "The question is not applicable to the company" and provide an explanation in the comment box.

Real Estate (REI and REM)

- Companies that have not marked "Development of major renovation and new construction" as one of the main activities of the business in the question "0.1 Denominator Area" should mark "The question is not applicable to the company".
- Companies that have marked "Development of major renovation and new construction" as one of their main activities in question "0.1 Denominator Area" but are only operating in urban environments should mark "The question is not applicable to the company" and provide an explanation in the comment box.

Consumer Discretionary (CNO, REX, TRT)

Companies in the following industries that only provide online services should mark "The question is not applicable to the company" and provide an explanation in the comment box.

- CNO Casinos & Gaming
- REX Restaurants & Leisure Facilities
- TRT Hotels, Resorts & Cruise Lines

Industrials (ICS)

Companies that are not involved in waste management activities should mark "The question is not applicable to the company" and provide an explanation in the comment box.

Disclosure Requirements

Additional credit will be granted for the public disclosure of the section elements listed below:

Process description

- Use of location-specific approach
- References to methodologies or frameworks used for assessment
- Integrated into multi-disciplinary company-wide risk management processes
- Dependency-related biodiversity risks considered in risk assessment
- Impact-related biodiversity risks considered in risk assessment

Scopes

- Own operations
- Adjacent areas to own operations
- Upstream activities
- Downstream activities

Risk identified

- All options need to be verifiable from public documents.

Data View	
QUESTION LEVEL INPUT	**COMPANY ANSWER**
Use of location-specific approach is publicly reported.	YES
The company assesses dependency- and impact-related biodiversity risks (2026)	Applicable
References to methodologies or frameworks used for assessment are publicly reported. (2026)	YES
Integration into multi-disciplinary company-wide risk management processes is publicly reported. (2026)	YES
Use of location-specific approach. (2026)	YES
References to methodologies or frameworks used for assessment?% explained. (2026)	YES
Dependency-related biodiversity risks considered in risk assessment are publicly reported. (2026)	YES
Integrated into multi-disciplinary company-wide risk management processes. (2026)	YES
Impact-related biodiversity risks considered in risk assessment are publicly reported. (2026)	YES
Dependency-related biodiversity risks considered in risk assessment. (2026)	YES
The scope of biodiversity risk assessment includes the company's own operations and is publicly reported. (2026)	YES
Impact-related biodiversity risks considered in risk assessment. (2026)	YES
The scope of biodiversity risk assessment includes adjacent areas to the company's own operations and is publicly reported. (2026)	-
Scope of biodiversity risk assessment? includes own operations (2026)	YES
The scope of biodiversity risk assessment includes the company's upstream activities and is publicly reported. (2026)	YES
The scope of biodiversity risk assessment includes the company's downstream activities and is publicly reported. (2026)	-
Scope of biodiversity risk assessment? includes adjacent areas to own operations (2026)	YES
Scope of biodiversity risk assessment? includes upstream activities	YES
Scope of biodiversity risk assessment? includes downstream activities	-
Biodiversity-related risks are identified and are publicly reported.	YES
Company has identified biodiversity risks and information.	Risks identified

Questionnaire

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

Does the company assess dependency- and impact-related biodiversity risks covering all its relevant activities?

1. (•)

Yes, the company assesses dependency- and impact-related biodiversity risks and it covers the following aspects:

Process description

Describe the processes used for identifying and assessing dependency- and impact-related biodiversity risks covering the elements below. Please indicate where this information is available:

Process description	Public reporting
1. ☑ Use of location-specific approach	1. ☑ Yes
1. ☑ References to methodologies or frameworks used for assessment	1. ☑ Yes
1. ☑ Integrated into multi-disciplinary company-wide risk management processes	1. ☑ Yes
1. ☑ Dependency-related biodiversity risks considered in risk assessment	1. ☑ Yes
1. ☑ Impact-related biodiversity risks considered in risk assessment	1. ☑ Yes

Scope of biodiversity risk assessment

Please define the scope of the company's biodiversity risk assessment. Please indicate where this information is available:

Scopes	Public reporting
1. ☑ Own operations	1. ☑ Yes
1. ☑ Adjacent areas to own operations	1. ☐ Yes
1. ☑ Upstream activities	1. ☑ Yes
1. ☐ Downstream activities	1. ☐ Yes

Risks identified

Please indicate if biodiversity risks were identified and where this information is available:

Risks identified	Public reporting
1. (•) Biodiversity-related risks identified	
2. ( ) No biodiversity-related risks	1. ☑ Yes
3. ( ) Not known	

2. ( )

No, the company does not assess dependency- and impact-related biodiversity risks.

3. ( )

The question is not applicable to the company.

4. ( )

The information is not available.

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
