# Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

BMV:BIMBO A (MI KEY: 4276592; SPCIQ KEY: 877906; TCUID: 53231)

**Additional Disclosure**

**Year:** Methodology Year: 2026
**Question:** Indirect Greenhouse Gas Emissions (Scope 2)
**Include Modeled Scores :** Yes

**Indirect Greenhouse Gas Emissions (Scope 2)**

## Question

Does the company track its indirect greenhouse gas emissions (Scope 2)?

## Rationale

The question assesses the company's indirect greenhouse gas (Scope 2) emissions and its overall trend. Emissions are a critical indicator of a company's impact on the climate. Increasingly, the disclosure of emissions is expected from investors, and growing regulatory pressure has led to the mandatory disclosure of certain emissions. By disclosing emissions, investors and stakeholders can ascertain a company's climate risks and identify trends in emissions reduction to benchmark against competitors.

| Performance Summary | |
|---|---|
| **Question Level Company Performance** | 90 |
| **Question Weight** | 13 |
| **Year-on-Year Change** | (10) |
| **Industry Average Score** | 40 |
| **Industry Highest Score** | 100 |

*The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.*

### Additional Question Guidance & Information Display

#### Key Definitions

**GHG Scope 2: Indirect impacts - energy use:** Many companies report the GHG emissions incurred in the generation of the electricity they consume. For service companies, these indirect emissions can be more important than their direct environmental impacts. Ways that companies can mitigate these emissions include paying a renewable tariff or improving energy efficiency.

**Location-based method:** This reflects the average emissions intensity of grids on which energy consumption occurs (using mostly grid-average emission factor data).

**Market-based method:** This reflects emissions from electricity that companies have purposefully chosen, or their lack of choice. It derives emission factors from contractual instruments, which include any type of contract between two parties for the sale and purchase of energy-bundled certificates or a party's unbundled instruments. Even companies that do not purchase any market instrument are expected to report market-based emissions. As per the GHG Protocol's requirements, companies should make their reports by using their electricity supplier's emission rate or the residual mix, i.e., regional emission factors representing untracked or unclaimed energy and emissions. If such data is not available, then their market-based emissions will be equal to their location-based emissions.

#### Data Requirements

Please provide the company's Scope 2 indirect GHG emissions from energy purchased (purchased and consume, i.e., without energy trading) for which its operations has a reliable and auditable data acquisition and aggregation system.

For each row in the table, it is mandatory that the values provided are in the same unit.

GHG emissions should be reported in metric tonnes of CO2-equivalent. Data on GHG emissions should include CO2 and all other GHG emissions weighted according to GHG potential.

Please report your location-based emissions and market-based emissions.

**Third-party verification:** We expect that data in the most recent year reported, for at least one reporting method, has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.

Please note: In case the company has reported a value of zero in the table, third-party verification or supporting evidence is required (e.g., comprehensive comment, internal documentation or public reporting) to substantiate the zero reported.

#### Data Consistency

- If the environmental performance data reported in the questionnaire do not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported.
- If there is a temporary reduction in coverage due to a corporation action, the corresponding box should be marked and the reduction should be explained.
- If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.
- If GHG emissions are only reported and tracked as combined Scope 1 and Scope 2 emissions, the combined figures should be indicated in the previous question, "Direct Greenhouse Gas Emissions (Scope 1)." The corresponding box should be ticked and this question, should be marked as "The question is not applicable to the company".

#### General Data Requirements

Environmental performance data should cover the activities of the entire company with the same consolidation as used in financial reporting and must refer to the financial year (e.g., Jan. 1to Dec. 31 for both financial and environmental data) and be aligned with the figures reported in the "Company Information" section.

**Target:** We require the absolute target for the most recent reporting year. If your company has a multiyear and/or relative target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing toward achieving the target by the end of the target period. If you report a combined Scope 1+2 target, please extrapolate the share equivalent to the absolute Scope 2 emissions for inclusion in the table.

Environmental performance data should only cover the indirect emissions/resource use, i.e., resource use/emissions caused by the company and its consolidated activities. Emissions and resource use of suppliers and customers should be excluded. In particular, the environmental data of group companies should follow these rules:

- Environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.
- Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.
- Environmental data of business travel other than by owned and/or operated fleet should not be included unless specifically asked for.
- Environmental data should refer to the specific company structure of each particular year. There should be no pro forma backward consolidation of the current company structure.
- Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated anymore.
- Environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.
- Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known.
- For indicators where a company has no emissions/resource use, "0" should be filled.
- Where the reported environmental data deviates from these definitions, you are asked to explain in what way the data provided differs from the definitions.
- If a company publicly reports on long-term targets instead of annual targets, an annual target has to be estimated based on internal target setting or linear distribution.
- The data must be provided in the unit indicated in the question. If the company is tracking the specific indicator in a different unit, the unit converter must be used to convert the data into the preferred unit.
- Please ensure that the "Company Information" section has been filled correctly and that the coverage in the table below is based on the same denominator.

#### Disclosure Requirements

**Disclosure Requirements for Partially Public Question**

Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Indirect GHG emissions (Scope 2) figure for at least the most recent reported year for a minimum of one of the two Scope 2 reporting methods.

### Data View

| QUESTION LEVEL INPUT | COMPANY ANSWER |
|---|---|
| Reliable and auditable data for company's indirect GHG emissions (Scope 2) | Applicable |
| Market based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2022) (met. ton. CO2e) | 61,393.000 |
| Market based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2023) (met. ton. CO2e) | 36,575.000 |
| Market based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2024) (met. ton. CO2e) | 26,807.000 |

# Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

| QUESTION LEVEL INPUT | COMPANY ANSWER |
|---|---|
| Market based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2025) (met. ton. CO2e) | 43,967.000 |
| Target for market based indirect Greenhouse Gas Emissions for last fiscal year reported (met. ton. CO2e) | Not answered |
| Indirect Greenhouse Gas Emissions: Data coverage for market based emissions (2022) | 100 |
| Indirect Greenhouse Gas Emissions: Data coverage for market based emissions (2023) | 100 |
| Indirect Greenhouse Gas Emissions: Data coverage for market based emissions (2024) | 100 |
| Indirect Greenhouse Gas Emissions: Data coverage for market based emissions (2025) | 100 |
| Public reporting: Indirect GHG Emissions (scope 2) data is publicly available | YES |
| Third party verification: Indirect GHG Emissions (scope 2) data verified by third party in the most recent fiscal year reported | - |
| Data consistency: Indirect GHG Emissions (scope 2) data reported in the questionnaire differs from publicly available data | - |
| Data consistency: Temporary coverage reduction or target challenge in Indirect GHG emissions (Scope 2) data due to corporate actions | - |
| Data consistency: Indirect GHG Emissions (scope 2) data is not reported in absolute terms and is normalized | - |
| Location based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2022) (met. ton. CO2e) | 461,252.000 |
| Location based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2023) (met. ton. CO2e) | 498,859.000 |
| Location based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2024) (met. ton. CO2e) | 451,447.000 |
| Location based indirect Greenhouse Gas Emissions from energy purchased and consumed (scope 2) (2025) (met. ton. CO2e) | 550,342.000 |
| Target for location based indirect Greenhouse Gas Emissions for last fiscal year reported (met. ton. CO2e) | Not answered |
| Indirect Greenhouse Gas Emissions: Data coverage for location based emissions (2022) | 100 |
| Indirect Greenhouse Gas Emissions: Data coverage for location based emissions (2023) | 100 |
| Indirect Greenhouse Gas Emissions: Data coverage for location based emissions (2024) | 100 |
| Indirect Greenhouse Gas Emissions: Data coverage for location based emissions (2025) | 100 |

**Questionnaire**

Does the company track its indirect greenhouse gas emissions (Scope 2)?

1. (●) Yes, the company tracks its Scope 2 emissions. Please indicate where this information is available.

| Scope 2 | Unit | FY 2022 | FY 2023 | FY 2024 | FY 2025 | Target for FY 2025 |
|---|---|---|---|---|---|---|
| **Location-based** | metric tonnes of CO2 equivalents | 461252 | 498859 | 451447 | 550342 | Not answered |
| **Coverage** (as a percentage of denominator) | percentage of: | 100 | 100 | 100 | 100 | |
| **Market-based** | metric tonnes of CO2 equivalents | 61393 | 36575 | 26807 | 43967 | Not answered |
| **Coverage** (as a percentage of denominator) | percentage of: | 100 | 100 | 100 | 100 | |

   1. [x] The data is publicly available.
   2. [ ] The data has been third-party verified.
   3. [ ] The data is normalized.
   4. [ ] The data differs from its publicly reported figures. Please provide an explanation:
   5. [ ] The coverage is temporarily reduced due to corporate actions. Please provide an explanation:

2. ( ) No, the company does not track its Scope 2 emissions.
3. ( ) The question is not applicable to the company.
4. ( ) The information is not available.
