Environmental Violations

Question

Does the company publicly report on paid significant fines or penalties related to the environment or ecology for the last four years?

Rationale

Companies are increasingly facing constraints related to natural resources globally and to the eco-services provided by the regions in which they operate. A strong environmental policy and management system (EMS) is needed to ensure the company improves its environmental performance, reducing raw material consumption and preventing degradation of the environment through waste and accidents. With this question, we assess the effectiveness of a company's EMS by evaluating the rate of several types of negative incidents over time and their impact on business operations.

Performance Summary	
Question Level Company Performance	30
Question Weight	30
Year-on-Year Change	30
Industry Average Score	31
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Significant Violation - $10,000 USD threshold: If the fines are individually equal to or less than $10,000 USD, the violations should not be reported in the table. The number of violations should only be reported here if the individual fine was over $10,000 USD (or equivalent in converted currency).

Violation: A violation occurs when an authorized body (e.g., governmental body, independent commercial or non-commercial regulator, etc.) determines that a law, regulation, code, etc. related to environmental or ecological issues has been breached.

This definition is essentially in line with the **GRI G4 Sustainability Reporting Guidelines definition of environmental laws and regulations:**

Refers to regulations related to all types of environmental issues (that is, emissions, effluents, and waste, as well as material use, energy, water, and biodiversity) applicable to the organization. This includes binding voluntary agreements that are made with regulatory authorities and developed as a substitute for implementing a new regulation. Voluntary agreements can be applicable if the organization directly joins the agreement or if public agencies make the agreement applicable to organizations in their territory through legislation or regulation.

Number of Violations: The number of violations should be based on specific codes/regulations, at the most granular level, not rolled up into larger cases (e.g., if a company receives one report from the EPA with 100 individual violations, the incident should be reported as 100 violations, not just one).

Date of Violation: The date of the violation should be the actual date the incident occurred, not the date responsibility was determined.

Ongoing legal proceedings/allegations:

- If one of the above organizations has already determined the company is responsible, the incident is considered a violation and should be reported (e.g., the civil or criminal case is to determine damages, penalties or type of responsibility).
- Once an initial judgment has been entered, the incident is considered a violation, regardless of the company's ability to appeal.
- If the company appeals and is absolved of all responsibility for the incident, the violation count and fines/penalties reported can be restated in the next CSA questionnaire.

If the company appeals and the fines/penalties are reduced, that figure can be restated in the next CSA questionnaire, but the violation(s) should remain if the fine remains above 10,000 USD (or equivalent in converted currency).

Fines/Penalties: Fines/penalties per year should be those related to the violations that occurred that year. In other words, if a violation occurred in 2011, but the fine was levied in 2012 and paid in 2013, both the violation and the fine should be included only in the 2011 column. Similarly, if an incident occurred in 1990 and the penalty was finalized and paid in 2014, the penalty does not need to be reported.

Environmental liability accrued at year-end: Fines or penalties not paid yet, including expected fines for cases that are not yet closed. In other words, it can be viewed as ongoing "tally" of outstanding expected fines or penalties, and includes violations that occurred in other years.

Disclosure Requirements

This question requires public evidence.

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's Environmental Violations.	Applicable
Number of violations of legal obligations/regulations related environment or ecological issues in the last four years. (2022)	0
Number of violations of legal obligations/regulations related environment or ecological issues in the last four years. (2023)	1
Number of violations of legal obligations/regulations related environment or ecological issues in the last four years. (2024)	Not answered
Number of violations of legal obligations/regulations related environment or ecological issues in the last four years. (2025)	0
Amount of fines/penalties paid related to environment or ecological issues in the last four years. (2022) (Mex$)	0.000
Amount of fines/penalties paid related to environment or ecological issues in the last four years. (2023) (Mex$)	610,055,000.000
Amount of fines/penalties paid related to environment or ecological issues in the last four years. (2024)	Not answered
Amount of fines/penalties paid related to environment or ecological issues in the last four years. (2025) (Mex$)	0.000
Accrued liability for environmental issues at the end of the year in the last four years. (2022)	Not answered
Accrued liability for environmental issues at the end of the year in the last four years. (2023)	Not answered
Accrued liability for environmental issues at the end of the year in the last four years. (2024)	Not answered
Accrued liability for environmental issues at the end of the year in the last four years. (2025)	Not answered

Questionnaire

Does the company publicly report on paid significant fines or penalties related to the environment or ecology for the last four years?

1. (●) Yes, the company publicly report on paid significant fines or penalties related to the environment or ecology for the last four years. Please indicate where this information is available in **public reporting or corporate website.**

Metric	FY 2022	FY 2023	FY 2024	FY 2025
Number of violations of legal obligations/regulations	0	1	Not answered	0
Amount of fines/penalties related to the above Currency:	0	610055000	Not answered	0
Environmental liability accrued at year end Currency:	Not answered	Not answered	Not answered	Not answered

2. ( ) No, the company has not paid any significant fines (> USD $10,000) related to environmental or ecological issues in the last four years. Please indicate where this information is available in **public reporting or corporate website.**
3. ( ) No, the company does not publicly report on paid significant fines or penalties related to the environment or ecology for the last four years.
4. ( ) The question is not applicable to the company.
