Certifications of Agricultural Crops

Question

Does the company track its exposure to agricultural crops including the amount used and whether they received certification from one or more independent third parties in the last financial year?

Rationale

Agriculture is a major driver of global environmental impacts. The industrialized production of agricultural commodities puts high pressure on the ecosystem and requires substantial resources. The awareness of environmental issues associated with food production (such as greenhouse gas emission, biodiversity loss, and deforestation) is increasing. In light of rising consumer demands for more transparency and natural products, the global production volume of certified agricultural commodities has increased in recent years.

While it is not the only solution to a complex problem, voluntary certification does provide a systematic approach to measure and document progress on pre-defined sustainability indicators. Robust, independent sustainability certifications allow stakeholders to monitor and compare companies' positioning on agricultural production.

Performance Summary	
Question Level Company Performance	25
Question Weight	20
Year-on-Year Change	5
Industry Average Score	28
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Agricultural crops: Crops can be classified as food, feed, fiber, or oil crops which are relevant to this question

Critical agricultural crops: The agricultural crops in this question have been selected based on their sensitivity to social and environmental risks which include - but are not limited to - climate change, biodegradation, deforestation, health and safety, human, labor & community rights.

Amount (metric tonnes): Refers to the amount of materials the company is exposed to. The amount is reported in metric tonnes.

Certification: In this question it refers to the certificate that was issued by an independent organization based on the company's compliance with pre-defined social and environmental standards related to the sustainable production of a particular agricultural commodity.

Type of certification: Whether the certification is considered as a leading type or other. See the data requirements section for more information.

Percentage of certified crops: The weight of a given agricultural crop that is certified as a percentage (%) of the total weight of said given crop.

Data Requirements

Please answer each row

The scope of this question regarding exposure to crops includes:

- Production of agricultural crops
- Production of ingredients derived from agricultural crops
- Production of products containing agricultural crops
- Production of products containing ingredients derived from agricultural crops

Coverage:

- If you have selected 'Yes, the company tracks its exposure to agricultural crops [...]' and you are providing information on certification in column C (Certification), please ensure to also provide data in column B (metric tonnes) and E (% of certified products).

Exposure:

- If your company is not exposed to a given crop, please select "Not applicable".

Leading Third-Party Certification List:

- **Palm Oil:** Roundtable on Sustainable Palm Oil (RSPO)
- **Soy:** Roundtable on Responsible Soy (RTRS)
- **Sugar:** BonSucro
- **Cacao:** Fairtrade
- **Coffee:** Rainforest Alliance incl. UTZ
- **Cereals:** FSA Gold
- **Cotton:** Global Organic Textile Standards
- **Tobacco:** Sustainable Tobacco Programme (STP)

Other Recognized Certification and Standards List:

- **Palm Oil:** Roundtable on Sustainable Biomaterials (RSB), Sustainable Agriculture Network (SAN), International Sustainability & Carbon Certification (ISCC), High Carbon Stocks Approach (HCS), Malaysian Sustainable Palm Oil (MSPO), Indonesian Sustainable Palm Oil (ISPO)
- **Soy:** Proterra, Cefetra Responsible Soy (CRS), International Sustainability & Carbon Certification Plus (ISCC+), ADM Responsible Soybean Standard, Cargill Triple "S"
- **Sugar:** Cristal Vision Level A, Vive, Fairtrade, Cristal Vision below Level A (e.g., B, C, D), Legislation Castilla Y Leon, Suiker Unie
- **Cacao:** Rainforest Alliance incl. UTZ, Bird Friendly
- **Coffee:** Common Code for the Coffee Community (4C), Fairtrade
- **Cereals:** Red Tractor Assurance, Stichting Veldleeuwerik (Dutch legislation), IRTAC, Sustainable growing malting barley, Sustainable Hellenic Farmland in a Glass (Barley), Soufflet Agriculture Production Charter (French legislation), SRP Sustainable Rice Platform, Selbstech Hoperibau, Irish Grain Assurance Scheme (IGAS), LEAF Marque Standard, GlobalGAP Combinable Crops, Vegaplan (Belgian Legislation), VVAK Sustainability Module (Dutch Legislation), Global G.A.P.
- **Cotton:** Better Cotton Standard, Organic Cotton Standards in the EU, USA and Japan, Fairtrade

If the company is not procuring any of the agricultural commodities that are being asked for this question, please answer "This question is not applicable to the company".

If the company is only into sea-food business (i.e., wild fisheries) etc. and is not procuring any of the agricultural commodities, please answer "The question is not applicable to the company". Kindly note that farmed sea-food (e.g., salmon, shrimp, tilapia, mussels, etc.) do not fall under this category, and companies exposed to these products are expected to respond due to their exposure to critical crops such as soy and cereals.

Industry-specific guidance

Companies in the Food & Drug Retailing Industry that only do drug retailing should mark this question as "The question is not applicable to the company" and provide an explanation in the comment box.

Disclosure Requirements

Supporting documents: The information disclosed in this question needs to be supported by either private or public documents for the following two aspects of each applicable crop. Please note that additional credit will be awarded for publicly available information:

- Certification
- Percentage of certified crops

QUESTION LEVEL INPUT	COMPANY ANSWER
No exposure to Cereals.	-
No Exposure to Cotton.	YES
No exposure to Tobacco.	YES
Palm Oil amount in metric tonnes. (metric tonnes)	158,137.000
Soy amount in metric tonnes. (2026) (metric tonnes)	Not answered
Company is exposed to agricultural crops. (2026)	Applicable
Sugar amount in metric tonnes. (metric tonnes)	Not answered
Cacao amount in metric tonnes. (metric tonnes)	Not applicable
Coffee amount in metric tonnes. (metric tonnes)	Not applicable
Cereals amount in metric tonnes. (metric tonnes)	Not answered
Cotton amount in metric tonnes. (metric tonnes)	Not applicable
Tobacco amount in metric tonnes. (metric tonnes)	Not applicable
Company uses palm oil and has obtained a certification.	Leading certification
Share of palm oil certified in total palm oil sourced/produced.	100
Company uses soy and has obtained a certification.	Not answered
Share of soy certified in total soy sourced/produced.	Not answered
Company uses sugar and has obtained a certification.	Not answered
Share of sugar certified in total sugar sourced/produced.	Not answered
Company uses cacao and has obtained a certification.	Not applicable
Share of cacao certified in total cacao sourced/produced.	Not applicable
Company uses coffee and has obtained a certification.	Not applicable
Share of coffee certified in total coffee sourced/produced.	Not applicable
Company uses cereals and has obtained a certification.	Not answered
Share of cereals certified in total cereals sourced/produced.	Not answered
Company uses cotton and has obtained a certification.	Not applicable
Share of cotton certified in total cotton sourced/produced.	Not applicable
Company uses tobacco and has obtained a certification.	Not applicable
Share of tobacco certified in total tobacco sourced/produced.	Not applicable
Evidence for certification and coverage data for palm oil is publicly available.	YES
Evidence for certification and coverage data for soy is publicly available.	-
Evidence for certification and coverage data for sugar is publicly available.	-
Evidence for certification and coverage data for cacao is publicly available.	-
Evidence for certification and coverage data for coffee is publicly available.	-
Evidence for certification and coverage data for cotton is publicly available.	-
Evidence for certification and coverage data for tobacco is publicly available.	-
Evidence for certification and coverage data for cereals is publicly available.	-

Questionnaire

Does the company track its exposure to agricultural crops including the amount used and whether it received certification from one or more independent third parties?

1. (•) Yes, the company tracks its exposure to agricultural crops including the amount used and whether it received certification from one or more independent third parties.

Agricultural crop	Amount (metric tonnes)	Certification	Type of certification	Percentage of certified crops	Supporting evidence	Public reporting
Palm oil						
1. ☐ Not applicable	158137		Leading certification	100	1. ☑ Yes	
Soy
