Include Modeled Scores : Yes

Waste Disposal

Question

Does the company track its total solid waste recycled/reused and disposed?

Rationale

The proper handling of waste can enhance companies' competitiveness through reduced costs and environmental liabilities. It can also lead to companies being better prepared for future environmental regulations. This question addresses trends in waste disposal and recycling, specific to each industry, as well as the target set for the current financial year.

Performance Summary	
Question Level Company Performance	38
Question Weight	25
Year-on-Year Change	11
Industry Average Score	28
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Total waste recycled/reused: This includes the part of the waste generated as a result of a company's operations (e.g., during extraction and processing of raw materials, manufacturing, consumption of final products or any other human activity), that has been diverted from disposal through preparation for reuse, recycling, composting or other recovery operations (i.e., processing of waste products, components or materials to be reused in place of new products, components or materials that should otherwise have been used for that purpose). This does **not** include waste incinerated with energy recovery (which is expected to be captured as part of the specific row under total waste disposed), or waste handled by third-parties such as, municipal waste management companies) unless it is clear that the waste is being recycled, prepared for reuse or composted by the third-party (see additional clarification in "Special data requirement for Waste").

Total waste disposed: This is the total of all waste directed to disposal, including waste landfilled, incinerated with energy recovery, incinerated without energy recovery or otherwise disposed (e.g., deep well injection). It also captures waste with "unknown disposal methods", such as waste handled by municipal waste management companies without any information available on the disposal methods used. For each method of disposal, the value includes both on and off-site disposal.

Data Requirements

Please provide a breakdown of the company's total solid waste recycled/reused and disposed, disaggregated by the type of disposal method, for which its operations has a reliable and auditable data acquisition and aggregation systems are available.

If the company does not use a specific waste disposal method, please indicate "0".

For each row in the table, it is mandatory that the values provided are in the same unit.

Specific Data Requirements for Waste

Waste should be reported in dry metric tons of waste, disaggregated by the amount recycled/reused and the specific disposal method (waste landfilled, waste incinerated with or without energy recovery, waste otherwise disposed or waste with unknown disposal method), respectively.

- In case the company reports zero total waste disposed, third-party verification or supporting evidence is required (e.g., comprehensive comment, internal documentation or public reporting) to substantiate zero waste disposed
- If you only have information available on the waste disposed by some or no specific disposal methods (waste landfilled, waste incinerated with or without energy recovery, otherwise disposed), please report the total waste disposed and the values for those disposal methods for which you have reliable data. The rows for disposal methods without available data should be left blank. The difference between total waste disposed and the sum of the specific disposal methods will be automatically captured in the row "waste with unknown disposal method". Please note that the company will not lose points if no detailed breakdown of the disposal methods used is available

For companies that have the questions **"Hazardous Waste", "Ash and Gypsum Waste" or "Mineral Waste" or "Food Loss & Waste Impact"** in their questionnaire, please do not report information on these types of waste here but rather, report relevant data for these types of waste separately in those questions. For example: if a company has the question on "Waste Disposal" and the question on "Hazardous Waste" in the questionnaire, non-hazardous waste should be captured in the question on "Waste Disposal" and hazardous waste in the question on "Hazardous Waste", respectively. If you do not have these questions in your industry questionnaire, please include all types of waste in this question.

If a company sets long-term, but not annual targets, an annual target can be estimated based on internal target setting or a linear distribution. If a company does not have a specific target on waste disposed but specific (internal or public) targets on waste generated and/or recycled, the conversion to a waste disposed target is acceptable.

Waste from extraordinary activities should not be considered. The definition of what is considered to be extraordinary should be consistent with financial reporting. For example: we would not expect a pharmaceutical company building its new headquarters to report the resulting construction waste.

Third-party verification: For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation showing this verification is attached. Internal audits or verification will not be considered.

Please note: In cases where the company is classified within the **banks (BNK)**, **financial services (FBN)**, **insurance (INS)**, or **professional services (PRO)** industries, the score obtained in this question will not contribute to the final score of the company.

Companies that do not operate their own production sites, such as **pure Royalty companies**, should mark this question as **"**The question is not applicable to the company**".**

Data Consistency

- If the environmental performance data reported in the questionnaire does not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all.
- If there is a temporary reduction in coverage due to, for example, a major acquisition, the corresponding box should be marked and the reduction should be explained.

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

- If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.
- If the data reported is not consistent with the definition provided above, the data should be provided in the table, the option should be marked, and an explanation of how it differs should be provided in the comment box.

General Data Requirements

Environmental performance data should cover the activities of the entire company with the same consolidation as used in financial reporting and must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section.

In particular, environmental data of group companies should follow the following rules:

- The environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.
- The environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.
- The environmental data should refer to the specific company structure of each particular year. There should be no pro-forma backward consolidation of the current company structure.
- The environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated anymore.
- The environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.
- Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known.
- Where the reported environmental data deviates from these definitions you are asked to please explain in what way the data provided differs from the definitions.
- Please ensure that the "Company Information" section is correctly filled and that the coverage in the table below is based on the same denominator.

Disclosure Requirements

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Total waste disposed figure, or alternatively, total waste generated **and** recycled figures) for at least the most recent reported year. The specific breakdown of the disposal methods used is not required to be publicly available.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's total solid waste recycled and disposed	Applicable
Total waste recycled/ reused (2022) (metric tonnes)	383,864.000
Total waste recycled/ reused (2023) (metric tonnes)	375,217.000
Total waste recycled/ reused (2024) (metric tonnes)	606,259.000
Total waste recycled/ reused (2025) (metric tonnes)	893,749.000
Total waste disposed (not recycled or reused) (2022) (metric tonnes)	13,805.000
Total waste disposed (not recycled or reused) (2023) (metric tonnes)	10,943.000
Total waste disposed (not recycled or reused) (2024) (metric tonnes)	27,365.000
Total waste disposed (not recycled or reused) (2025) (metric tonnes)	20,280.000
Target for waste disposal for last fiscal year reported (metric tonnes)	Not answered
Waste disposal: Data coverage (2022)	100
Waste disposal: Data coverage (2023)	100
Waste disposal: Data coverage (2024)	100
Waste disposal: Data coverage (2025)	100
Public reporting: Waste disposal data is publicly available	YES
Third party verification: Waste disposal data verified by third party for most recent fiscal year reported	YES
Data consistency: Waste disposal data reported in the questionnaire differs from publicly available data	-
Data consistency: Temporary coverage reduction or target challenge in waste disposal data due to corporate actions	-
Data consistency: Waste disposal data is not reported in absolute terms and is normalized	-
Total waste incinerated with energy recovery (2022) (metric tonnes)	Not answered
Total waste incinerated with energy recovery (2023) (metric tonnes)	Not answered
Total waste incinerated with energy recovery (2024) (metric tonnes)	6,413.000
Total waste incinerated with energy recovery (2025) (metric tonnes)	7,362.000
Total waste otherwise disposed (not landfilled or incinerated) (2022) (metric tonnes)	Not answered
Total waste otherwise disposed (not landfilled or incinerated) (2023) (metric tonnes)	Not answered
Total waste otherwise disposed (not landfilled or incinerated) (2024) (metric tonnes)	49.000
Total waste otherwise disposed (not landfilled or incinerated) (2025) (metric tonnes)	67.000
Total waste disposed with unknown disposal method (2022) (metric tonnes)	13,805.000

QUESTION LEVEL INPUT	COMPANY ANSWER
Total waste disposed with unknown disposal method (2023) (metric tonnes)	10,943.000
Total waste disposed with unknown disposal method (2024) (metric tonnes)	0.000
Total waste disposed with unknown disposal method (2025) (metric tonnes)	0.000
Total waste landfilled (2022) (metric tonnes)	Not answered
Total waste landfilled (2023) (metric tonnes)	Not answered
Total waste landfilled (2024) (metric tonnes)	12,931.000
Total waste landfilled (2025) (metric tonnes)	11,577.000
Description of other waste disposal methods used	Waste with a confinement method
Total waste incinerated without energy recovery (2022) (metric tonnes)	Not answered
Total waste incinerated without energy recovery (2023) (metric tonnes)	Not answered
Total waste incinerated without energy recovery (2024) (metric tonnes)	7,972.000
Total waste incinerated without energy recovery (2025) (metric tonnes)	1,274.000

Questionnaire

Does the company track its total solid waste recycled/reused and disposed?

1. (●)

   Yes, the company tracks its total solid waste recycled/reused and disposed. Please indicate where this information is available.

Waste	Unit	FY 2022	FY 2023	FY 2024	FY 2025	Target for FY 2025
Total waste recycled/reused	metric tonnes	383864	375217	606259	893749	
Total waste disposed	metric tonnes	13805	10943	27365	20280	Not answered
- Waste landfilled	metric tonnes	Not answered	Not answered	12931	11577	
- Waste incinerated with energy recovery	metric tonnes	Not answered	Not answered	6413	7362	
- Waste incinerated without energy recovery	metric tonnes	Not answered	Not answered	7972	1274	
- Waste otherwise disposed, please specify: Waste with a confineme	metric tonnes	Not answered	Not answered	49	67	
- Waste with unknown disposal method	metric tonnes	13805.000000	10943.000000	0.000000	0.000000	
Coverage (as a percentage of denominator)	percentage of:	100	100	100	100	

   1. [x] The data is publicly available.
   2. [x] The data has been third-party verified.
   3. [ ] The data is normalized.
   4. [ ] The data differs from its publicly reported figures. Please provide an explanation:
   5. [ ] The coverage is temporarily reduced due to corporate actions. Please provide an explanation:

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

2. No, the company does not track its total solid waste recycled/reused and disposed.
3. The question is not applicable to the company.
4. The information is not available.
