Material Issues for Enterprise Value Creation

Question

Does the company report the three most important material issues (economic, environmental, or social) that have the greatest impact on its business and how these issues impact the business and serve as significant determinants of long-term value creation?

Rationale

Leading companies are increasingly focused on the most material topics that drive their long-term value creation. These issues can cover economic, environmental and social issues, and are key drivers for a company's long-term business performance. The question assesses whether companies have conducted a materiality analysis of the most important issues that drive long-term value creation and whether they are able to link these issues to their business performance.

Companies are asked to make a business case and should focus on the economic, environmental or social issues that are most important for business performance. Companies should indicate which of the three value drivers are impacted by the factors of revenues, costs or risk, and which strategies, products or initiatives are linked to these factors.

Performance Summary	
Question Level Company Performance	67
Question Weight	25
Year-on-Year Change	17
Industry Average Score	55
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Material issue: A material issue is a sustainability factor that has or will have an impact on the company's value drivers, competitive position and long-term shareholder value creation.

Materiality assessment: A materiality assessment is an approach to identify critical economic, environmental and social issues that have a significant impact on the company's business performance.

Materiality assessment frequency: We expect companies to conduct a materiality assessment and to report the results in at least one of the two most recent annual or sustainability reports.

Data Requirements

1. Material Issue

Our expectations:

- Companies have conducted a materiality analysis and identified the most important issues driving long-term performance.
- Companies clearly define the three most material economic, environmental, or social issues driving long-term value creation.

Not acceptable:

- Purely financial metrics/issues (net profit, cash flow, earnings per share, product sales).
- Operational business metrics/issues (e.g., market expansion, efficient use of capital, operational excellence).
- General issues without a description of the specific sub-issues that might impact the company's performance (e.g., macroeconomic conditions, long-term shareholder value).
- Please note that companies that do not provide an acceptable material issue do not receive points for any of the sub-questions related to that material issue.

2. Business Case

Our expectations:

The business case should contain the following information:

- A clear link between the material issue and the business case.
- Clear explanation of why the issue is material to the company's performance in terms of cost/revenue/risk/opportunity. (e.g., cost savings, revenue generation, operational efficiency, operational risks with direct impact on financial performance).

Not acceptable:

- The business case is not linked to the material issue.
- The Business case does not link the material issue to the company's performance in terms of costs, revenues, risks, or opportunity.
- The business case is describing the material issue and its importance for the society/environment but does not provide information on why the issue is relevant to the company's performance or business (e.g., impact of global warming on society).
- The business case and impact are not specific to your company (e.g., discussion on the material issue's impact on the industry).

3. Business Strategies

Our expectations:

- The company provides a clear explanation of the strategies, initiatives, or products or services through which it addresses the material issue.

Not acceptable:

- Strategies, initiatives, or products or services that do not directly address the material issue.
- Strategies that are not clearly described (e.g., human resources-oriented management).
- Description of the current situation without providing the strategies or products to address this situation.
- Provision of a target instead of a strategy, initiative, or product (e.g., zero fatalities or injuries).

Disclosure Requirements

- The document(s) you attached will be used to verify your response.
- The supporting documents need to be available in the public domain.
- Any response that cannot be verified in the attached public document(s) or web link will not be accepted.
