CFA RESEARCH CHALLENGE · GRUPO BIMBO (BIMBOA)

Capital IQ Input and Alternative Routes (round 3)

What the account can do, Prompt F (already run, no new data) and routes outside Capital IQ for the open ESG gaps

---

Date: 2026-10-17

Status: Capital IQ has no prompt left worth running; Prompt F returned no document

Rounds 1, 2 and 3 are already compiled in the wiki

Contents

1. What the account can and cannot do
2. Prompt F - Grupo Bimbo: document retrieval (already run, 2026-10-17; no new data)
3. Routes outside Capital IQ
4. Questions for Investor Relations

Rounds 1, 2 and 3 were run and compiled into `wiki/Risks-ESG/bimbo-esg-capiq-gap-fill-2026-10.md` (section 11 for round 3). Round 2 showed what this Capital IQ account cannot do, and round 3 (Prompt F) returned no document at all, so **Capital IQ has no prompt left worth running**. This file has three parts: what the account can do, Prompt F (kept for the record, already run), and the routes outside Capital IQ for every open gap.

Spanish note: la ronda 2 mostró que la cuenta de Capital IQ solo recupera documentos de Grupo Bimbo (informes y suplementos) y no tiene los módulos de puntajes ESG de S&P, Trucost, CDP, gobierno ni propiedad. La ronda 3 (Prompt F) devolvió un error de servicio y ningún documento. Ya no queda un prompt útil en Capital IQ; las brechas abiertas se cierran con las rutas de la sección 3.

1. What the account can and cannot do

Capability	Evidence from rounds 1 and 2
Read Grupo Bimbo annual reports, integrated reports, financial supplements and the AGM notice	Works (Prompt A, E: emissions, water, safety, workforce, bond KPI, pay design)
Structured S&P Global ESG Scores, Trucost, CDP, governance and ownership of peers	**Not available** (B1, B2, B3 returned no data)
MSCI, Sustainalytics, ISS, FTSE4Good, DJSI, CDP water, Bloomberg ESG, involvement screens, controversies	**Not in this account** (Prompt C)
Ownership of private Mexican companies	Profiles exist but ownership, directors and parents are empty; Monser has no profile (Prompt D)
FY2025 integrated report and annex, assurance letters, bond KPI report	Not found in round 2 or in round 3 (Prompt F: service error, zero documents), although the wiki has FY2025 figures from the annex filed to LSEG

Do not run the round-2 prompts B1, B2, B3, C and D, or Prompt F, again: the answer will be the same.

2. Prompt F - Grupo Bimbo: document retrieval (already run, 2026-10-17; no new data)

Status: **exhausted.** Answer saved in `data/capitaliq/capiq-ai-esg-r3-F_2026-10-17.md`. The service returned an error on F1-F4 and no document, so every FY2025 value is N/A; the FY2023 Scope 3 categories and the FY2024 total it repeats were already in the wiki. Rerun only if the team confirms that the FY2025 integrated report and the assurance letters are now indexed in its Capital IQ account, and then ask one task at a time. The text is kept below for the record and for that case.

```
CFA Research Challenge - Grupo Bimbo, document retrieval. Entity: "Grupo Bimbo, S.A.B. de C.V."
(Mexico, BMV ticker BIMBO A), not "Bmvb Immo". State the entity you used. Answer only from Grupo
Bimbo's own documents and give the document name, page and date for every value. Write N/A when a
value is not in the documents; never estimate or compute your own. If a document is not available, say
its name and stop on that task.

TASK F1 - In the FY2025 integrated report ("Celebramos", filed 2026) and its data annex: total
recordable incident rate, lost-time injury frequency rate, number of employee fatalities and hours
worked for 2025; payroll employees at 2025-12-31 by region and by gender; employee turnover; women in
leadership positions.

TASK F2 - In the FY2024 integrated report annex (GRI 305-3): Scope 3 emissions in tCO2e by GHG
Protocol category for 2024. In the same annex (GRI 303-3): the definition of the line "Total
Drinkable" used for 2019-2022 and why the global totals for 2019-2022 differ from the 5,910 ML (2023)
and 6,425 ML (2024) of the plant totals.
```

```
TASK F3 - Assurance statements: the name of the verifier, the standard and the date of the
verification statements for the FY2024 and FY2025 greenhouse-gas inventory, and any statement on the
end-2025 Scope 3 KPI of the BIMBO 23-2L certificate.

TASK F4 - In the FY2025 annual report: the sentence or table that says whether the 2019 base
recalculated in 2025 will be used for the BIMBO 23L Scope 3 target of 2030.

Output: one markdown table per task with value, unit, period, document, page and date, then a list of
anything not retrieved.
```

3. Routes outside Capital IQ

Open gap (ESG report, section 8)	Route	Owner and note
3 Peer ESG data for nine comparables	(a) Use the LSEG ESG scores already in the wiki for 12 food peers (`bimbo-esg-lseg-scores-and-policies`). (b) Build a small manual table from public sources: each peer's latest sustainability report (Scope 1, 2, 3 and renewable electricity), the public SBTi target dashboard (status, base and target year), CDP public scores, and the proxy statement (independent directors, women on the board, chair, ESG-linked pay)	Team; tag each number with its document. The assistant can draft the table once the team picks the sources
4 MSCI, Sustainalytics, ISS, DJSI, FTSE4Good	Public pages of each vendor, the S&P Global Sustainability Yearbook list, FTSE4Good constituent list, or another university licence	Team
5 Pay-dimension weights, CEO pay, pay ratio	Investor Relations; proxy for the 2027 AGM	Team (IR email)
6 Owners of Normaciel, Monser, Philae, Valacci, Marlupag and Frexport	Investor Relations; the public company registry (Registro Público de Comercio); the annual-report section on persons with significant influence	Team (IR email, registry)
9 FY2025 LSEG ESG scores	LSEG workspace	Team
10 Sustainalytics second-party opinion; KPI and allocation reports	Investor Relations; Sustainalytics	Team (IR email)
11 Business-involvement screen detail	A Capital IQ Sustainability screen run by someone with that licence	Team
13 FY2024 Scope 3 by category; verifier of FY2024 and FY2025 emissions; FY2025 safety and workforce; base used for the 23L test	Prompt F returned nothing. Download the FY2025 integrated report and its data annex (GRI 305-3, 303-3, 403-9, 2-7) and the verification statements from Grupo Bimbo's investor-relations site or the Bolsa Mexicana de Valores filings, or ask Investor Relations (questions 2 and 6 below)	Team (public PDFs, IR email)

4. Questions for Investor Relations

1. Provide the Sustainalytics second-party opinion of the April 2023 Sustainable Financing Framework and any annual KPI or allocation verification report.
2. Will the recalculated 2019 baseline (Scope 3 11,423,977 t) be used for the BIMBO 23L test of 2030, or the original 8,021,824 t? Who verified the end-2025 test of BIMBO 23-2L?
3. What is the amount of the separate sustainability CapEx budget since 2025?
4. Who owns Frexport, and why did purchases rise from MXN 1,069 million (2023) to MXN 1,929 million (2024)?

5. What are the weights of the four variable-pay dimensions and of the ESG indicators, and who are the holders behind Normaciel, Monser, Philae, Valacci and Marlupag?
6. What does the line "Total Drinkable" in the GRI 303-3 table of 2019-2022 include, and what is the global water withdrawal for each of 2019-2022 on the same basis as the 5,910 ML of 2023?
