GMO Statement

Question

Does your company have a public commitment on the topic of GMO?

Rationale

Considering the evolving landscape around GMOs, companies are expected to be transparent and publicly disclose their stance towards the GMO issues. In this question, we assess whether the company has a public statement on GMOs.

Performance Summary	
Question Level Company Performance	0
Question Weight	70
Year-on-Year Change	0
Industry Average Score	17
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definition

Genetically Modified Organisms (GMOs): organisms (i.e. plants, animals or microorganisms) in which the genetic material (DNA) has been altered in a way that does not occur naturally by mating and/or natural recombination. The technology is often called "modern biotechnology" or "gene technology", sometimes also "recombinant DNA technology" or "genetic engineering". It allows selected individual genes to be transferred from one organism into another, also between nonrelated species. (Source: WHO)

The scope of this question is any type of product that contains GM material greater than 0.9 percent, in line with EU GMO labelling requirements set out in Regulation (EC) No 1829/2003.

Examples are genetically modified seeds, crops (cotton, corn, soybean, wheat, rice), plants (papaya, potato, tomato, canola, sugar beets), fish (salmon) etc.

Ingredients derived from GMOs: ingredients which are derived from organisms whose genetic materials (DNA) has been modified in a way that does not occur naturally. Examples are corn flour from genetically modified corn, and cottonseed oil from genetically modified cotton.

Products that contain GMOs or ingredients derived from GMOs: products which contain either organisms whose genetic material (DNA) has been modified or ingredients which are derived from derived from organisms whose

genetic materials (DNA) has been modified in a way that does not occur naturally. Examples are foods produced from genetically modified corn or using ingredients from genetically modified corn, and animal feed produced from genetically modified soybean or using ingredients from genetically modified soybean.

GMOs in the production process: GMOs used in the production process refers using GMOs as tools to manufacture products and the final products are not GMOs or contain GMOs or ingredients derived from GMOs. For example, company uses genetically modified micro-organisms in the fermentation processes to produce large quantities of desired products while the products are not GMOs or contain GMOs or ingredients derived from GMOs.

Data Requirements

The following companies should mark this question as “Not Applicable” and provide a brief explanation in the comment box:

- BVG companies that only do bottling and do not source their own raw materials to produce their own products
- FDR companies that do not have private label (or own brand) products in retailing or distribution
- FDR companies classified under Drug Retail
- Commodities companies that only trade raw materials that cannot be genetically modified e.g. palm oil, rubber

The following companies that should not mark the question as “Not Applicable”:

- BVG companies that produce their own products that contain GMOs or ingredients derived from GMOs
- FDR companies that have private label (or own brand) products that contain GMOs or ingredients derived from GMOs in retailing or distribution
- FOA companies that use animal feed with GMOs or ingredients derived from GMOs
- REX companies that use GMOs or ingredients derived from GMOs

Companies answering “No, our company does not have any GMO exposure” in the GMO Exposure question are still expected to answer the GMO Statement question and mark the GMO Revenues question as Not Applicable.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company has a publicly available statement covering the use of GMOs	Not known - not measured
Availability and relevance of the statement on GMOs has been verified	Not known - not measured
Clear reporting and evaluation of potential risks related to GMOs	Not known - not measured
Clear statement related to the labelling of all products that contain GMOs or ingredients derived from GMOs greater than 0.9	Not known - not measured

Questionnaire

Does your company have a **publicly available** statement on GMOs?

1. Yes, we have a public statement on GMOs stating that we do not produce GMOs, do not use GMOs in raw materials or in the production process. Please provide a public reference:
2. Yes, we have a public statement on GMOs and we disclose whether we use GMOs in products, raw materials and/or in the production process. Please provide a public reference and select any of the elements that it covers:

1. ☐

   We clearly report and evaluate potential risks related to GMOs.

2. ☐

   We clearly state that we label all products that contain GMOs or ingredients derived from GMOs (even where it is not required by law). **Please note that the scope of this question is any type of product that contains GM material greater than 0.9 percent.**

3. ○

   No, we do not have a publicly available statement on GMOs.

4. ○

   Not applicable. Please provide explanations in the comment box below.

5. ○

   Not known

Additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
