Reporting on Breaches

Question

Does the company publicly report on breaches of the code of conduct for the last financial year?

Rationale

Organizations are increasingly expected by the marketplace, international norms, and stakeholders to demonstrate their adherence to integrity, governance, and good business practices. Reporting to authorities is mandatory in many countries but our questions are looking for evidence of transparent corporate reporting to all stakeholders. This question assesses the transparency a company shows in relation to breaches of its codes of conduct or anti-corruption & bribery policies towards its stakeholders, both for the occurrence of incidents as well as the company's response.

Performance Summary	
Question Level Company Performance	50
Question Weight	8
Year-on-Year Change	25
Industry Average Score	13
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Data Requirements

Both the disclosure of the code of conduct breaches and the comprehensiveness of the disclosure are assessed. When assessing the comprehensiveness of the disclosure, aspects such as the number of cases, the types and categories of cases (such as bribery, privacy, and discrimination), and the consequences of the breaches are considered. Filings to authorities that are not publicly available to all stakeholders will not be considered here.

If there were no code of conduct breaches, the second option "We publicly report that no breaches have occurred during the most recent reporting cycle" should be chosen and indicate where this is publicly reported.

The absence of breaches needs to be publicly disclosed for the purpose of this question and an indication of where this is publicly reported should be given. A comment indicating that no breaches occurred and that reporting would have been available in the event of such breaches occurring is not sufficient for this question.
