Board Gender Diversity

Question

Does the company report the number of women on its board of directors/supervisory board?

Rationale

We assess whether the board reflects the diversity of the workforce and marketplace, thereby ensuring that a variety of viewpoints are heard and factored into corporate decision-making. A commitment to diversity at all levels can help companies attract employees, create goodwill with consumers, and better compete in diverse markets globally, which in turn benefits long-term shareholder value. Gender diversity has been an important topic of discussion in recent years, and various academic studies have shown a correlation between gender diversity and corporate performance, for example in corporate governance (Adams and Ferreira, 2009) or company innovation (Dezsö and Ross, 2012).

Performance Summary	
Question Level Company Performance	22
Question Weight	14
Year-on-Year Change	0
Industry Average Score	31
Industry Highest Score	100

Data Requirements

For two-tier boards: Employee representatives and senior executives should not be included in the total number of women for two-tier boards as they are not considered in the calculation of the total size of the supervisory board.

For one-tier boards: Employee representatives should not be included in the total number of women on the board for one-tier boards. If there are no women on the board of directors or supervisory board, you should write 0 in the answer to this question.

For this question we are looking for the number of women on your company's board of directors/supervisory board.

- If your company has a one-tier board structure, this figure includes: female executive directors, non-executive directors and independent directors.
- If your company has a two-tier board structure, this figure ONLY includes female independent directors and non-executive directors (this means that senior executives and employee representatives should not be included). Hence the management board should not be considered in this question.

References

The study **"Corporate Governance, Board Diversity, and Firm Value"** (October 2001) examined Fortune 1000 firms and found a significant positive relationships between the fraction of women or minorities on the board and firm value.

GRI Standards 102-22,405-1 & 102-8 are relevant for this question.
