Question: Energy Consumption
Include Modeled Scores : Yes

Energy Consumption

Question

Does the company track its energy consumption?

Rationale

Producing more with less material is essential for many industries affected by the growing natural resource scarcity. Operational Eco-Efficiency enhances competitiveness in terms of cost reductions and reduced environmental liabilities. It also enables companies to be better prepared for future environmental regulations. The key focus is on inputs and outputs of business operations and assessing trends in natural resource consumption and environmental waste production specific to each industry.

In this question we are aiming to find out the total energy consumption Please list renewable energies separately and specify the type of renewable energy in the text box.

Performance Summary	
Question Level Company Performance	100
Question Weight	24
Year-on-Year Change	17
Industry Average Score	31
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

▼ Additional Question Guidance & Information Display

Key Definitions

A) Non-renewable fuels: This includes transport fuels and fuels for electricity generation such as nuclear fuels, coal, oil, natural gas, etc.

B) Non-renewable electricity purchased: This excludes self-generated electricity.

C) Steam/heating/cooling and other energy purchased (only non-renewable energy): If there is no explicit mention of renewables, assume non-renewable energy. Exclude self-generated steam/heating/cooling from fuels listed in A.

D) Total renewable energy (wind, solar, biomass, hydroelectric, geothermal, etc.) purchased or generated: Includes both purchased and self-generated energy.

E) Total non-renewable energy sold (electricity, heating & cooling): Primarily for electric utilities, for most other companies this will be **"Not applicable"**

F) Total non-renewable energy consumption: Sum of (A + B + C) minus E

G) Total cost of energy consumption: (see below)

• Energy costs include electricity, direct purchases, fuel for owned-energy production, other fuel, etc., plus depreciation of owned-energy projects, minus related income (e.g. generated by waste sold for energy production, energy sold from owned-energy facilities, etc.). It does not include total capital investment or maintenance costs. In the table, the methodology for total costs of energy consumption can be selected from three options:

• 1) total cost of energy purchased

• 2) total cost of energy purchased, minus income generated (e.g. by waste sold for energy production, energy sold from owned-energy facilities, etc.)

• 3) total cost of energy purchased plus depreciation of owned-energy projects, minus income generated

• Please pay attention to the correct conversion of units! See also: https://www.iea.org/reports/unit-converter-and-glossary#unit-converter

• NB: we only score total non-renewable energy consumption, so if you don't have all data available it is ok to only provide data for Total non-renewable energy consumption

Data Requirements

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Total non-renewable energy consumption for at least the most recent reported year.

Third-party verification: For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.

For this question, we encourage you to provide evidence that is publicly available and may grant additional credit for publicly available evidence.

Data Consistency

• If the environmental performance data reported in the questionnaire do not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all

• If there is a temporary reduction in coverage due to, for example, a major acquisition, the corresponding box should be marked and the reduction should be explained

• If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.

General Data Requirements

• Environmental performance data should cover the activities of the entire company with the same consolidation as used in financial reporting and must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section

• **Target:** We require the absolute target for the most recent reporting year. If your company has a multiple year and/or relative target, please extrapolate what the target value would have to be for the last financial year to make sure you are progressing well towards achieving the target by the end of the target period.• In particular, environmental data of group companies should follow the following rules:

• Environmental data of companies that are consolidated at-equity must not be considered.• Environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.

• Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.

• Environmental data of business travel other than by owned and/or operated fleet should not be included unless specifically asked for.

• Environmental data should refer to the specific company structure of each particular year. There should be no pro-forma backward consolidation of the current company structure.

• Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated any more.• Environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.

• Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known• Where the reported environmental data deviates from these definitions you are asked to explain in what way the data provided differs from the definitions.• If a company publicly reports on long-term but not annual targets, an annual target has to be estimated based on internal target setting or a linear distribution.• The data must be provided in the unit indicated in the question. If the company is tracking the specific indicator in a different unit, the unit converter must be used to convert the data into the preferred unit.• Please ensure that the Company Information section has been correctly filled in, and that the coverage in the table below is based on the same denominator.

QUESTION LEVEL INPUT	COMPANY ANSWER
Absolute Score calculated for Energy Consumption question.	0.000

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

QUESTION LEVEL INPUT	COMPANY ANSWER
Energy Consumption: selection list type	Applicable
Non-renewable fuels (nuclear fuels, coal, oil, natural gas, etc.) purchased and consumed (A) (2017) (MWh)	5,401,308.915
Non-renewable fuels (nuclear fuels, coal, oil, natural gas, etc.) purchased and consumed (A) (2018) (MWh)	5,982,880.000
Non-renewable fuels (nuclear fuels, coal, oil, natural gas, etc.) purchased and consumed (A) (2019) (MWh)	5,818,270.830
Non-renewable fuels (nuclear fuels, coal, oil, natural gas, etc.) purchased and consumed (A) (2020) (MWh)	5,640,837.500
Non-renewable electricity purchased (B) (2017) (MWh)	919,597.559
Non-renewable electricity purchased (B) (2018) (MWh)	990,464.720
Non-renewable electricity purchased (B) (2019) (MWh)	728,093.880
Non-renewable electricity purchased (B) (2020) (MWh)	470,666.000
Steam/heating/cooling and other energy (non-renewable) purchased (c) (2017) (MWh)	0.000
Steam/heating/cooling and other energy (non-renewable) purchased (c) (2018) (MWh)	0.000
Steam/heating/cooling and other energy (non-renewable) purchased (c) (2019) (MWh)	0.000
Steam/heating/cooling and other energy (non-renewable) purchased (c) (2020) (MWh)	0.000
Energy Use: Specification: Total renewable energy (biomass, solar, wind energy etc.) purchased or generated for own consumption	Renewable Energy from Windfarms & Solar
Total renewable energy (wind, solar, biomass, hydroelectric, geothermal, etc.) purchased or generated (D) (2017) (MWh)	165,693.243
Total renewable energy (wind, solar, biomass, hydroelectric, geothermal, etc.) purchased or generated (D) (2018) (MWh)	221,644.467
Total renewable energy (wind, solar, biomass, hydroelectric, geothermal, etc.) purchased or generated (D) (2019) (MWh)	533,194.440
Total renewable energy (wind, solar, biomass, hydroelectric, geothermal, etc.) purchased or generated (D) (2020) (MWh)	797,228.000
Total non-renewable energy (electricity and heating & cooling) sold (E) (2017) (MWh)	0.000
Total non-renewable energy (electricity and heating & cooling) sold (E) (2018) (MWh)	0.000
Total non-renewable energy (electricity and heating & cooling) sold (E) (2019) (MWh)	0.000
Total non-renewable energy (electricity and heating & cooling) sold (E) (2020) (MWh)	0.000
Energy Consumption: Total non-renewable energy consumption (2017) (MWh)	6,320,906.474
Energy Consumption: Total non-renewable energy consumption (2018) (MWh)	6,973,344.720
Energy Consumption: Total non-renewable energy consumption (2019) (MWh)	6,546,364.710
Energy Consumption: Total non-renewable energy consumption (2020) (MWh)	6,111,503.500
Energy Consumption: Total non-renewable energy consumption last FY target (MWh)	6,435,310.640
Energy Use: Energy: Cost type	Costs
Energy Use: Energy: Total Costs of Energy Consumption (2017)	Not answered
Energy Use: Energy: Total Costs of Energy Consumption (2018)	Not answered
Energy Use: Energy: Total Costs of Energy Consumption (2019)	Not answered
Energy Use: Energy: Total Costs of Energy Consumption (2020)	Not answered
Energy Consumption: Energy: Data coverage (2017)	100
Energy Consumption: Energy: Data coverage (2018)	100
Energy Consumption: Energy: Data coverage (2019)	100
Energy Consumption: Energy: Data coverage (2020)	100
Public reporting: Energy consumption data publicly available	YES
Energy Consumption: Third party verification: Non-renewable energy consumption data verified by third party for most recent FY	-
Energy Consumption: Data consistency: Non-renewable energy consumption data reported above differs from publicly available data	YES
Energy Consumption: Data consistency: Temporary coverage reduction or target challenge in non-renewable energy consumption data due to corporate actions	-
Energy Consumption: Data consistency: Non-renewable energy consumption data not reported in absolute terms and is normalized	-

Questionnaire

Please complete the following table about total energy consumption. For each row in the table, it is mandatory that the values provided are in the same unit. Please see the Information Button for definitions of the cost options. Also, please ensure that you have correctly filled in the Company Information section at the beginning of the questionnaire, and that the coverage in the table below is related to the denominator relevant for your company as indicated in that section.

1. (●)

Total energy consumption	Unit	FY 2017	FY 2018	FY 2019	FY 2020	What was your target for FY 2020?
a) Non-renewable fuels (nuclear fuels, coal, oil, natural gas, etc.) purchased and consumed	MWh	5401308.915	5982880	5818270.83	5640837.5	
b) Non-renewable electricity purchased	MWh	919597.5585	990464.72	728093.88	470666	
c) Steam / heating / cooling and other energy (non-renewable) purchased	MWh	0	0	0	0	
d) Total renewable energy (wind, solar, biomass, hydroelectric, geothermal, etc.) purchased or generated. Please specify: Renewable Energy from	MWh	165693.2431	221644.4674	533194.44	797228	
e) Total non-renewable energy (electricity and heating & cooling) sold	MWh	0	0	0	0	
TOTAL NON-RENEWABLE ENERGY CONSUMPTION (A+B+C-E)	MWh	6320906.4735	6973344.72	6546364.71	6111503.5	6435310.64
Total costs of energy consumption: Costs	Currency:	Not answered	Not answered	Not answered	Not answered	
Data coverage (as % of denominator)	percentage of:	100	100	100	100	

PUBLIC REPORTING

1. ☑ Our data is publicly available. Please provide supporting evidence or web link.

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

THIRD-PARTY VERIFICATION

1. ☐ Our data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

DATA CONSISTENCY

1. ☑ We report publicly on this information, but the data in the table above differs from our publicly reported figures. Please provide an explanation in the comment box for this difference:
2. ☐ We have a temporary coverage reduction or target challenge due to corporate actions. Please briefly explain if a merger, acquisition, divestment, etc. has temporarily caused a reduction in your ability to report optimal coverage or caused your target to appear abnormal:
3. ☐ We are not able to report this information in absolute terms, the information provided in the table above is normalized data. For the purpose of this question, please always provide absolute figures if available.
2. ○ We do not track energy consumption
3. ○ Not applicable. Please provide explanations in the comment box below.
4. ○ Not known

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.
