Waste Disposal

Question

Does the company track its total solid waste recycled/reused and disposed?

Rationale

Producing more with less material is essential for many industries affected by the growing scarcity of natural resources. Operational Eco-Efficiency enhances competitiveness in terms of cost reductions and reduces environmental liabilities. It also enables companies to be better prepared for future environmental regulations. The key focus is on inputs and outputs of business operations and the assessment of trends in the consumption of natural resources and the production of environmental waste products specific to each industry.

Performance Summary	
Question Level Company Performance	67
Question Weight	24
Year-on-Year Change	1
Industry Average Score	24
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Key Definitions

Total waste generated: Waste may be generated during the extraction and processing of raw materials, during product manufacturing, during the consumption of final products, and during any other human activity. For the purposes of this question, we are interested only in solid waste.

Total waste used/recycled/sold: Generated waste which has been reused, recycled or sold for instance for energy recovery purposed.

Total waste disposed: It is defined as waste that is landfilled, subject to deep well injection or incinerated without energy recovery (either on-site and off-site). It is waste generated minus waste used/recycled/sold.

Data Requirements

Specific data requirement for Waste

Waste should be reported in dry metric tonnes of waste. Waste disposed should include materials landfilled, subject to deep well injection or incinerated without energy recovery (both on-site and off-site).

Materials that are sent offsite for beneficial use (such as for recycling, re-purposing, or energy recovery) should be reported in this question separately.

Waste from extraordinary activities should not be considered. The definition of what is considered to be extraordinary should be consistent with financial reporting. Example: we would not expect a pharmaceutical company building its new headquarters to report the resulting construction waste.

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Total waste disposed figure for at least the most recent reported year.

Third-party verification: For third-party verification, we expect that data in the most recent year reported has been third-party verified and that relevant documentation is attached showing this verification. Internal audits or verification will not be considered.

Data consistency

• If the environmental performance data reported in the questionnaire do not correspond to the publicly reported figures, the corresponding option should be marked and the discrepancy should be explained. This option should not be indicated if the information is not publicly reported at all.

• If there is a temporary reduction in coverage due to, for example, a major acquisition, the corresponding box should be marked and the reduction should be explained.

• If it is not possible to report the figures in absolute terms, the data should be reported in relative terms and the corresponding box should be ticked. Please note that information should always be reported in absolute terms if possible, even if it deviates from public reporting.

• If the data reported are not consistent with the definition provided above, the data should be provided in the table, the option should be marked, and an explanation of how it differs should be provided in the comment box.

General data requirements

• For companies who have the **EP - Hazardous Waste or EP - Mineral Waste** questions in their questionnaire, please do not report this information here but rather, report that data separately in those questions. If you do not have those questions in your industry questionnaire, please include hazardous and mineral waste data here.

• For companies who have the **EP - Ash and Gypsum Waste** question in their questionnaire, ash and gypsum waste data should be tracked in both **EP - Waste** and **EP - Ash and Gypsum Waste** questions.

• Environmental performance data should cover the activities of the entire company with the same consolidation as used in financial reporting and must refer to the financial year (e.g., 01/01 to 31/12 for both financial and environmental data) and be aligned with the figures reported in the Company Information section question.

In particular, environmental data of group companies should follow the following rules

• Environmental data of companies that are consolidated at-equity must not be considered.

• Environmental data of companies that are consolidated proportionally must be considered to the proportion at which they are consolidated financially.

•Environmental data of companies that are fully consolidated must be fully considered irrespective of the proportion to which they belong to the group.

• Environmental data of business travel other than by owned and/or operated fleet should not be included unless specifically asked for.

• Environmental data should refer to the specific company structure of each particular year. There should be no pro-forma backward consolidation of the current company structure.

• Environmental data of companies that are sold or no longer consolidated should be excluded from environmental data as of the reporting period in which the company has not been consolidated any more.

• Environmental data of companies that have been bought should only be included as of the reporting period in which the company is consolidated financially for the first time.

• Where environmental data does not cover all consolidated activities of the company, the scope should be indicated together with the environmental data that is known.

• Where the reported environmental data deviates from these definitions you are asked to explain in what way the data provided differs from the definitions.

• If a company publicly reports on long-term but not annual targets, an annual target has to be estimated based on internal target setting or a linear distribution.

• Please ensure that the Company Information section has been correctly filled in, and that the coverage in the table below is based on the same denominator.

Data consistency: Waste disposal data reported above differs from publicly available data	YES
Data consistency: Temporary coverage reduction or target challenge in waste disposal data due to corporate actions	-
Data consistency: Waste disposal data not reported in absolute terms and is normalized	-

Questionnaire

Please provide your company's **total solid waste disposed (i.e. not recycled, reused or incinerated waste for energy recovery)** for the part of your company's operations for which you have a reliable and auditable data acquisition and aggregation system.

For each row in the table, it is mandatory that the values provided are in the same unit. Also, please ensure that you have correctly filled in the Company Information section at the beginning of the questionnaire and that the coverage in the table below is related to the denominator relevant for your company as indicated in that section.

If you have the **EP - Hazardous Waste and/or EP - Mineral Waste** questions in your industry questionnaire, please do not report this information here but rather, report that data in those separate questions.

If you **do not** have those questions in your industry questionnaire, please include hazardous and mineral data here.

1. (●)

Waste disposed	Unit	FY 2017	FY 2018	FY 2019	FY 2020	What was your target for FY 2020?
a) Total waste generated	metric tonnes	303050	381969	319605	357785	
b) Total waste used/recycled/sold	metric tonnes	281150	337524	301040	332586	
TOTAL WASTE DISPOSED (A - B)	metric tonnes	21414	43896	18565	25199	Not answered
Data coverage (as % of denominator)	percentage of:	100	100	100	100	

PUBLIC REPORTING

1. [x] Our data is publicly available. Please provide supporting evidence or web link.

THIRD-PARTY VERIFICATION

1. [ ] Our data has been third-party verified in the most recent financial year reported. Please provide supporting evidence.

DATA CONSISTENCY

1. [x] We report publicly on this information, but the data in the table above differs from our publicly reported figures. Please provide an explanation in the comment box for this difference:
2. [ ] We have a temporary coverage reduction or target challenge due to corporate actions. Please briefly explain if a merger, acquisition, divestment, etc. has temporarily caused a reduction in your ability to report optimal coverage or caused your target to appear abnormal:
3. [ ] We are not able to report this information in absolute terms, the information provided in the table above is normalized data. For the purpose of this question, please always provide absolute figures if available.

2. ( ) We do not track generated waste.
3. ( ) Not applicable. Please provide explanations in the comment box below.
4. ( ) Not known
