Question: Water-Related Stakeholder Conflicts
Include Modeled Scores : Yes

Water-Related Stakeholder Conflicts

Question

How does your company manage stakeholder conflicts concerning water resources? Please tick only if the statement is valid for the majority of your production plants/sites located in water-stressed areas and provide supporting evidence. If you do not have any production plants in water-stressed areas, please indicate which type of risk management measures have generally been taken with regards to water-related risks at your company.

Rationale

In water risk management, stakeholder conflicts are a key risk to take into consideration. With this question, we assess the management of conflicts with stakeholders, as plant closures have been forced upon corporations due to lack of communication/information from local populations/politics.

Performance Summary	
Question Level Company Performance	75
Question Weight	16
Year-on-Year Change	0
Industry Average Score	38
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Data Requirements

Supporting evidence:

- The document(s) you attached will be used to verify your response.
- The supporting documents do not need to be available in the public domain.
- If a question text field is available, a comprehensive answer in that field can be accepted instead of a supporting document.
- Any response that cannot be verified in the attached document(s) or via the information provided in the related question text field (if available) will not be accepted.

For companies with exposure to water-stressed areas - indicate policies or risk management measures **that apply to the majority** of the plants/sites located in water-stressed areas.

For companies with NO exposure to water-stressed areas - this question needs to be answered by all companies as it also assesses preparedness for future changes in conditions (both in terms of company structure and geographical conditions). Please indicate any policies or risk management measures that have been taken on a corporate level relating to water stress or water-related risks.

References

GRI Standard 303-1 is relevant for this question.

Data View

QUESTION LEVEL INPUT	COMPANY ANSWER
Company's approach to managing stakeholder conflicts concerning water resources	Applicable
Company manages stakeholder conflicts concerning water resources through systematic tracking and monitoring of existing stakeholder conflicts	YES
