Question: Training & Development Inputs
Include Modeled Scores : Yes

Training & Development Inputs

Question

Please fill out the following table for the related training & development data for the last fiscal year and attach supporting evidence of where this information is reported.

Rationale

To address the skills gap challenge and remain competitive in attracting and retaining talents, companies must carefully assess their investments in training, upskilling, and reskilling their workforce. Training and development can lead to outcomes such as reduced turnover, reduced external hiring costs, and a more engaged and committed workforce. This question assesses whether companies are leveraging their current workforce capabilities by investing in their training and development and whether these investments are made fairly across the entire employee base.

Performance Summary

Question Level Company Performance	91
Question Weight	15
Year-on-Year Change	(9)
Industry Average Score	30
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Full-time equivalents (FTEs): FTEs refers to the number of working hours that represents one full-time employee during a fixed period. The concept is used to convert the hours worked by several part-time employees into the hours worked by full-time employees.

Average hours of training and development per FTE: This refers to the total hours of training and development provided in the last financial year divided by the total number of FTEs.

Average amount spent on training and development per FTE: This refers to the total investment on training and development in the last financial year divided by the total number of FTEs. This figure should not include operational expenses such as the salaries of the "learning and development" team.

Type of training: Different types of training may include but are not limited to "on-the-job" training, coaching, mentorship, leadership training, compliance training, cultural diversity training, IT training, OHS training, etc.

Data Requirements

- **Please note:** If you have **25 or less FTEs** in the organization, then **please answer "The question is not applicable to the company".**
- **Difference in coverage of the different KPIs:** This question asks for two different KPIs. In case the reporting coverage of these KPIs is different, e.g., a company can provide data for "Average hours of training spent per FTE" for 70% of FTEs, but "Average amount spent per FTE" for only 30% of FTEs, then for consistency reasons, the company should provide data for both KPIs for 30% of FTEs.
- **Difference between publicly and privately available data:** Companies should report information in line with their public reporting. For example in a case where company publicly reports on "Average hours of training and development per FTE" for 50% of FTEs but could answer the question with a larger coverage that it is only privately available (e.g., for 100% of FTEs), the company should fill out the question based on the publicly available information which is verifiable.

Disclosure Requirements

Disclosure Requirements for Partially Public Question

Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Average hours of training spent per FTE for the most recent financial year and/or
- Average amount spent per FTE on training and development programs for the most recent financial year.

Data Breakdown:

- Companies can provide a data breakdown for either of the two KPIs requested, i.e., "Average hours of training spent per FTE" and/or "Average amount spent per FTE on training and development programs".
- We don't expect companies to break down the data by all the categories mentioned in the question, but full points for this section will be granted for having a breakdown for at least two categories. The purpose of this section is to assess whether companies can track these KPIs to evaluate and reassure the fair treatment of all employees.
- In Europe, according to **Article 9 of the GDPR**, it is prohibited to process personal data revealing racial or ethnic origin, except if the data subject has given explicit consent to the processing of this data, provided this is not prohibited by national law. Other exemptions exist, such as reasons of substantial public interest which might include statistical research purposes for equality of opportunity and treatment. We therefore expect companies to report on **only two different categories** to not penalize companies that do not report data breakdown on race.
- For this section, companies can attach either private or public evidence and we expect the specific data to be broken down by these categories, e.g., "x% average hours of training spent per FTE" for junior employees, y% for mid-level managers and z% for senior managers.

Questionnaire

Does the company track its training & development data for the last four financial years?

1. (•) Yes, the company tracks its training & development data for the last four financial years.

Please indicate the percentage of global FTEs the data in the table below represents:

> 75% of all FTEs globally

Metric	FY 2022	FY 2023	FY 2024	FY 2025	Supporting evidence	Public reporting
Average hours per FTE of training and development	25	26	26	28		1. ☑ Yes
Average amount spent per FTE on training and development Currency:	258	191	156.9	136.18		1. ☑ Yes

Grupo Bimbo, S.A.B. de C.V. | ESG Scores Raw Data

The company breaks down the data for either of the KPIs above based on the following categories. Please select any that apply:

1. ☐ Age group
2. ☑ Gender
3. ☑ Management level (e.g. junior/low level, middle, senior/top level management)
4. ☐ Race, ethnicity, nationality, country of origin, cultural background
5. ☐ Type of training

2. ○ No, the company does not track its training & development data for the last four financial years.
3. ○ The question is not applicable to the company.
4. ○ The information is not available.
