Fatalities

Question

Does the company track its work-related fatalities for employees and contractors?

Rationale

The tracking of work-related injuries and fatalities should cover a company's entire operations, including internal employees and external contractors. This is crucial for ensuring that legal requirements are met, problematic and/or dangerous operations can be identified, and that safety measures can be improved.

Performance Summary	
Question Level Company Performance	9
Question Weight	25
Year-on-Year Change	4
Industry Average Score	32
Industry Highest Score	100

The question layout and the company's verified information is provided below. No information is shown if the company did not provide any information or if it opted out of sharing non-public information.

Additional Question Guidance & Information Display

Key Definitions

Work-related fatalities: The death of a worker resulting from an occupational disease or injury sustained or contracted while performing duties controlled by the organization or at workplaces under the organization's control.

Contractor: Persons or organizations working on-site or off-site on behalf of an organization. A contractor can contract its workers directly, or contract subcontractors or independent contractors.

Data Requirements

OIE Sector: For Services Companies (consultancy or seismic surveying), please mark **"The question is not applicable to the company".**

Please note: If you have **25 or fewer full-time equivalents (FTEs)** in your organization, then **please mark "The question is not applicable to the company".**

Disclosure Requirements

Disclosure requirements for partially public question. Additional credit will be granted for relevant publicly available evidence covering the following aspect of this question:

- Number of work-related fatalities for employees and contractors for at least the most recent reported year.

Data View
