Grupo Bimbo, S.A.B. de C.V. | Power Plants

BMV: BIMBO A (MI KEY: 4276592; SPCIQ KEY: 877906)

Development Type: All
Prime Mover: All
Fuel: All
Country: Mexico
State/Admin Region: All
Owner: All

Construction costs represent the entire project, not proportioned by owner

S&P Global Market Intelligence guarantees coverage of operational power plant units that file data with the EIA or are larger than 1 MW. S&P Global Market Intelligence does not comprehensively cover operational plants below this threshold. S&P Global Market Intelligence comprehensively covers power projects (generation or environmental) with units over 1 MW and supplying more than 50% of power generated to the grid.

A regulatory status of "regulated" indicates that at least one of a power plant's owners has its rate base regulated by a state Public Utility Commission or municipal rate-setting authority. If any owned portion of the plant is regulated, the entire plant and its units are marked regulated; otherwise, the plant is marked unregulated. Regulatory status only applies for US power plants.
